Slider Question Type

Last Modified on 11/25/2014 4:52 pm MST

Available to: Solo Basic Pro Enterprise

The Slider is an interactive question that allows respondents to select a values from a continuous range by dragging a slider along a range.

1. On a scale of 1 to 10, how likely are you to refer Pete's Pet Sitting to a friend or family member?

1- Not at all Likely   4   5 - Extremely Likely

Check it out in an example survey!

When To Use It

The Slider is an excellent way to engage your respondents with an interactive numeric sliding scale. Use a Slider List depending on your needs!

Setup

1. Click the **Question** link on the page where you would like to add your Slider question and input your question title.

2. From the **Question Type** menu select **Slider**.

3. Now customize your **Slider Settings**:

Allow values between: Customize both the lowest value of the slider range (by default the slider will have a minimum of 0) and the highest value of the slider range (by default the slider will have a maximum of 100)

Slider increment value: This is the increment that will occur as the slider is moved along the range (the default will be 1)

Starting value of slider: This is where the slider will be located on the range before answering (the default start value is 0, this means the slider will start on the left). *Make sure this value is between the minimum and maximum value.*

Slider Settings

Allow values between

0   100

Increment Value:

1

Starting Value:

0

4. Click **Layout.**

5. From here you can customize your labels, which are blank by default.

Left Label:

Unhappy

Center Label:

Neutral

Right Label:

So Happy

6. There are even more options for your slider question in the **Layout** tab.

Orientation of Labels & Options: By default, question display horizontally but you can opt to display it vertically

Slider Display: By default, the slider question will display the value being recorded to the respondent. You can opt to **Hide the value of the slider** instead.

You can also opt to **Flip the min and max values** of the slider. This will display the max value on the left and the min value on the right (or, for vertical sliders, this will display the max value at the bottom and the min value at the top). *If you choose to flip the min and max values be sure to double check that you left and right labels correspond to the flipped values!*

Options Format

Orientation of Labels & Options:

○ Vertical

◉ Horizontal

Sliders

Slider Display:

☐ Hide the value of the slider

☐ Flip the min and max values

7. Preview! The slider question we created above will look like this!
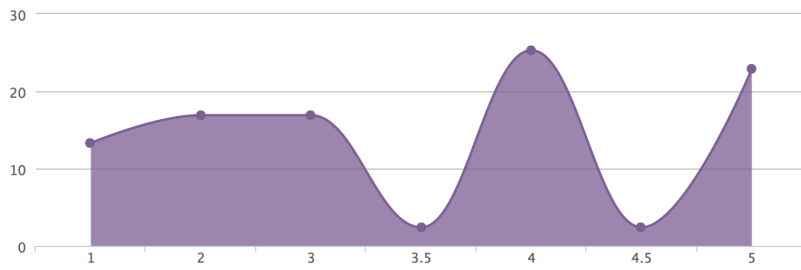

1. On a scale of 1 to 10, how likely are you to refer Pete's Pet Sitting to a friend or family member?

1- Not at all Likely   ──────●──────   5 - Extremely Likely

Reporting

Single Sliders report as a Area Chart with a table that includes an average.

1. On a scale of 1 to 10, how likely are you to refer Pete's Pet Sitting to a friend or family member?

Statistics	
Sum	276.0
Average	3.3
StdDev	1.3
Max	5.0
Total	83

Exporting

In the CSV/Excel export, the data is displayed in a single column.
