

Email Question Type

An Email question is a short-answer, open-text field with validation that ensures entries are email addresses.

When To Use It

Use Email questions to gather email addresses from your respondents.

What is your email address?

jane@email.com|

Check it out in an [example survey](#) !
[Add a survey](#) with this question to your account!

Placeholder Text

Use the **Layout** tab to provide placeholder text for your Email question. Placeholder text can serve as guidance for your survey respondents, showing them the expected format of the answer.

Visit the [expanded documentation](#) for additional information.

Advanced

Default Answer

Ex: dogs,cats,birds

[Select a Merge Code](#)

HTML Placeholder

jon.smith@company.net

CSS Class Name

Placeholder text is displayed as follows within your question, and will be overridden by the respondent as they provide their answer.

6. What is your email address?

Survey Taking

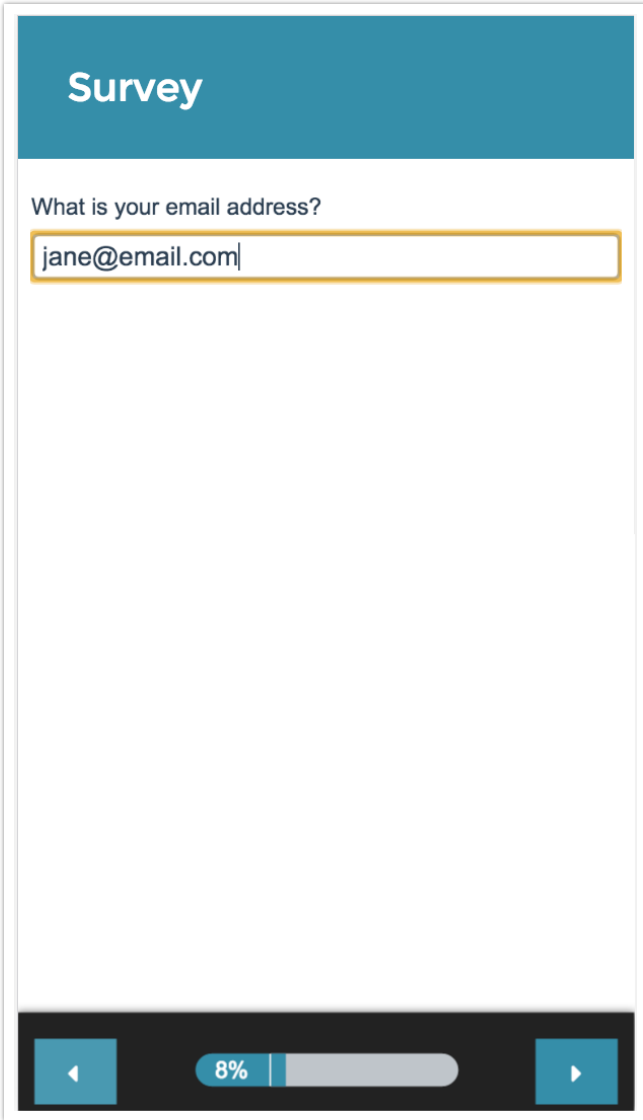

On a desktop and most laptops the Email question type looks like so.

What is your email address?

When optimized for mobile devices the Email question type looks very similar.

By default, survey questions show one at a time on mobile devices to prevent the need for scrolling on smaller screens. You can turn off this [one-at-a-time interaction](#) if you wish.

Reporting

In the Standard Report Email questions report as a [collapsed response list](#) , by default.

[+](#) See additional compatible chart types

[+ See what other report types are compatible](#)

Exporting

In the CSV/Excel export, the data is displayed in a single column within the spreadsheet.
