

# Star Rating Grid Question Type

Star Rating Grid questions allow respondents to use stars to rate multiple items (rows) on multiple dimensions (columns). Each star represents the equivalent numeric value for that rating (e.g. Four stars will report a 4).

The X next to each set of stars allows respondents to clear their answer if they change their mind or misclick. You can also choose to provide respondents with a Not Applicable option.

2. Please rate our staff on the below characteristics:

	Friendliness	Knowledge	Helpful
Cashier	<input checked="" type="checkbox"/> ★★★★★ <input type="radio"/> Not Applicable	<input checked="" type="checkbox"/> ★★★★★ <input type="radio"/> Not Applicable	<input checked="" type="checkbox"/> ★★★★★ <input type="radio"/> Not Applicable
Pharmacist	<input checked="" type="checkbox"/> ★★★★★ <input type="radio"/> Not Applicable	<input checked="" type="checkbox"/> ★★★★★ <input type="radio"/> Not Applicable	<input checked="" type="checkbox"/> ★★★★★ <input type="radio"/> Not Applicable
Deli Counter Staff	<input checked="" type="checkbox"/> ★★★★★ <input type="radio"/> Not Applicable	<input checked="" type="checkbox"/> ★★★★★ <input type="radio"/> Not Applicable	<input checked="" type="checkbox"/> ★★★★★ <input type="radio"/> Not Applicable

## When To Use It

Use Star Rating Grid questions as an interactive way to ask your respondents to rate a list of items on multiple characteristics. For example, rate things like customer service and satisfaction.

## Setup

This question can be a little tricky to set up so let's walk through it together!

1. Click the **Question** link on the page where you would like to add your Star Rating Grid question.
2. Select **Star Rating Grid** from the Question Type dropdown and enter the question you wish to ask.
3. Enter the characteristics you wish for the survey respondent to rate the elements on as **Column Headers**. In our example, survey respondents will rate our service reps on their Friendliness, Knowledge, and Helpfulness. Keep in mind you will need to have at least one column header so even if you are just gathering a single star rating for 2

or 3 movies you will need to put something in at least one column header for the stars to appear. Something like "Rating" should work!

**Column Headers** [Advanced Option Settings](#)

Friendliness   

Knowledge   

Helpful   

[+ Click to Add Option](#) [Paste in Options](#)

4. Scroll to the column headers and row headers and enter the elements you wish for the survey respondent to rate as row headers. In our example, we entered service reps.

**Row Headers**

Service Rep 1   

Service Rep 2  

[+ Click to Add Option](#) [Paste in Options](#)

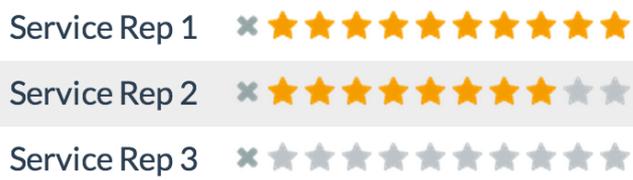

5. Make sure to click **Save Question** when you are finished.

## Common Customizations

On the **Answers** tab of your Star Rating question, you can change the number of stars available (2-10) for survey respondents to select.

Please rate our customer service reps:

Rating

You can also choose to provide a Not Applicable option for each cell of your Star Rating question on the Answers tab.

The screenshot shows the configuration interface for a 'Star Rating Grid' question. It has a dark blue header with the title 'Star Rating Grid' and several tabs: 'Question', 'Answers', 'Logic', 'Validation', 'Layout', and 'Piping / Repeat'. The 'Answers' tab is selected. Under 'Number of Stars', there is a dropdown menu set to '5' and a checkbox labeled 'Use blue stars when re-populating from a previous response'. Under 'Not Applicable', there is a checked checkbox labeled 'Include a not applicable option'.

## Survey Taking

On a desktop and most laptops, the Star Rating Grid question type looks like so.

Please rate our customer service reps on the below characteristics:

	Friendliness	Knowledge	Helpful
Service Rep 1	✘ ★ ★ ★ ★ ★ ★	✘ ★ ★ ★ ★ ★ ★	✘ ★ ★ ★ ★ ★ ★
Service Rep 2	✘ ★ ★ ★ ★ ★ ★	✘ ★ ★ ★ ★ ★ ★	✘ ★ ★ ★ ★ ★ ★
Service Rep 3	✘ ★ ★ ★ ★ ★ ★	✘ ★ ★ ★ ★ ★ ★	✘ ★ ★ ★ ★ ★ ★

When optimized for mobile devices the Star Rating Grid question type displays each row one at a time. It will also have larger targets as mobile respondents will be using their finger to select answers.

You can turn off the [one-at-a-time interaction](#) if you wish.

## Star Rating Grid

Please rate our customer service reps on the below characteristics:

Service Rep 1

Friendliness

Knowledge

25%

## Reporting

Star Rating Grid questions report as a table with summary statistics. Count will be available by default, whereas Min, Max, Average, and Standard Deviation can be included via **Layout & Options**.

If the report is embedded, you will only see the averages without the stars.

## Exporting

In [CSV/Excel exports](#) , each row and column pairing is displayed as a column. The numeric star rating value is reported in the cells.

V	W	X	Y	Z	AA	AB	AC	AD
Friendliness: 1	Knowledge: 5	Helpful: 1	Cash: 5	Friendliness: 1	Knowledge: 2	Helpful: 4	Phar: 1	Deliverability: 1
4	5	not applicable	4	2	4	1	4	1
2	2	3	2	3	2	4	2	4
3	4	2	3	4	3	2	3	2
5	2	4	5	4	5	3	5	3
not applicable	not applicable	3				5		5

## FAQ: Can I Base Logic Off the Star Rating Grid?

You can! But only under certain circumstances. The question must have a single column and thus a single value per row in order to set up logic.

Example 1: Star Rating Grid question that **would work** for setting up logic.

1. How would you rate our customer service?

Rating

Customer Service ✕ ★★★★★

Example 2: Star Rating Grid question that **would work** for setting up logic.

2. How would you rate the following aspects of our customer service?

Rating

Promptness	x	★	★	★	★	★	★	★	★
Enthusiasm	x	★	★	★	★	★	★	★	★
Accuracy	x	★	★	★	★	★	★	★	★
Overall	x	★	★	★	★	★	★	★	★

Example 3: Star Rating Grid question that **would NOT work** for setting up logic.

If you set up logic off of any given row in the below question it would trigger based on the response to the first column.

3. Please rate each of our mediums of customer service on the following aspects.

	Promptness	Enthusiasm	Accuracy	Overall
Email	x ★ ★ ★ ★ ★ ★ ★	x ★ ★ ★ ★ ★ ★ ★	x ★ ★ ★ ★ ★ ★ ★	x ★ ★ ★ ★ ★ ★ ★
Phone	x ★ ★ ★ ★ ★ ★ ★	x ★ ★ ★ ★ ★ ★ ★	x ★ ★ ★ ★ ★ ★ ★	x ★ ★ ★ ★ ★ ★ ★
Chat	x ★ ★ ★ ★ ★ ★ ★	x ★ ★ ★ ★ ★ ★ ★	x ★ ★ ★ ★ ★ ★ ★	x ★ ★ ★ ★ ★ ★ ★

### How Do I Set Up Logic on a Star Rating Grid Question?

If your Star Rating Grid question has 1 row and 1 column the set up is quite simple.

**Note:** This configuration requires that both your Star Ranking Grid question and follow-up question are located on the same survey page.

1. How would you rate our customer service?

Rating

Customer Service ✕ ★★☆☆☆

Let's say, for example, that we wish to ask a follow-up Essay question *"Please tell us more about what we can do better"* if the rating was 3 stars or lower.

On the **Logic** tab of our follow-up Essay question, we will select the option to **Only show this question based on answers to previous questions or other logic conditions**. Then, in the first dropdown we will select the row header below the overall question title for our star rating grid question.

Previous Questions – Page 2

Q 3. How would you rate our customer service?

✓ • Customer Service

System Data

• Time Taken on Survey (in seconds)

Current Date

For the logic operator, we will select **is one of the following**. [Learn more about Logic Operators](#).

In the final field, we'll specify a comma-separated list of the options for which we wish to show our follow-up Essay question. Our completed logic rule will look like so:

## Logic Rule

Only show this question based on answers to previous questions or other logic conditions

Remove All Logic

• Service Rep 1 is one of the 1,2,3

+ Add Condition

+ Add Group

Test it out in this [example survey](#) !

For Star Rating Grid questions with multiple rows and a single column the set up is identical you'll just choose the appropriate row.

Check out a Star Rating Grid with logic based on multiple rows in this [example survey](#) .

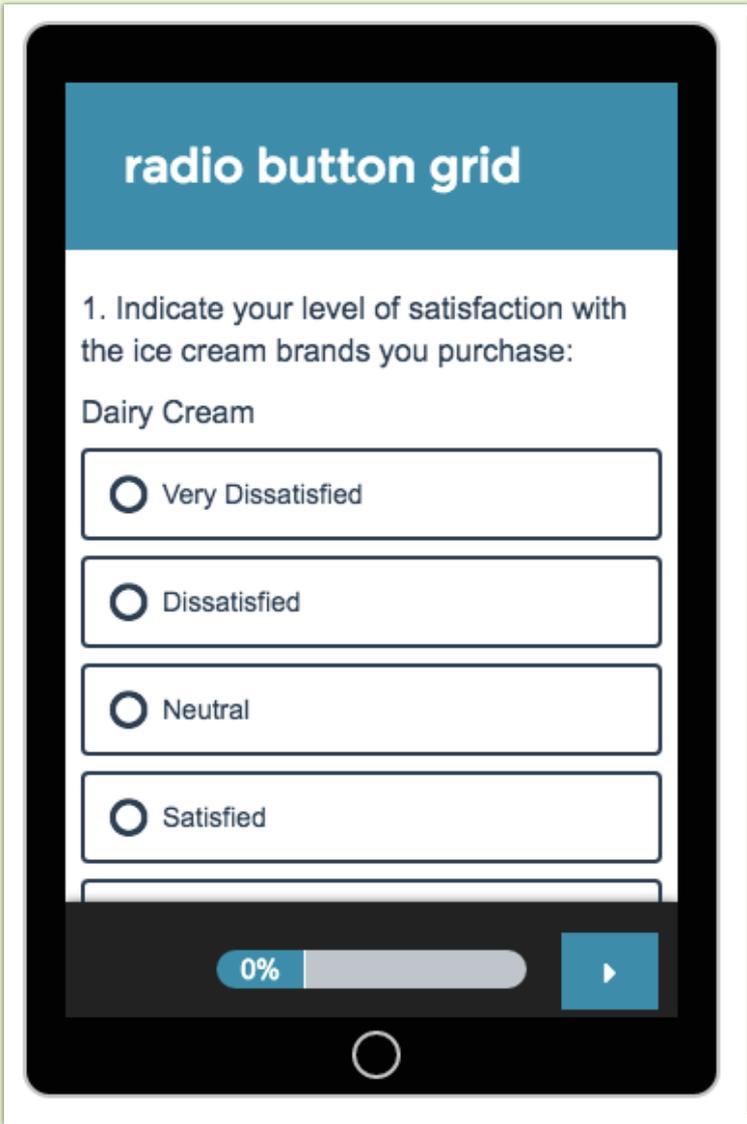

### Best Practice Tip: Grid Questions on Mobile Devices

Grid questions are often used to allow your survey respondents to make comparisons. For example, in the below question, survey respondents are implicitly making a comparison across the various ice cream brands listed in the rows.

1. Indicate your level of satisfaction with the ice cream brands you purchase:

	Very Dissatisfied	Dissatisfied	Neutral	Satisfied	Very Satisfied
Dairy Cream	<input type="radio"/>				
Tasty Treat	<input type="radio"/>				
Wholesome	<input type="radio"/>				
Sugar Cow	<input type="radio"/>				
Ice Dream	<input type="radio"/>				
Jill's	<input type="radio"/>				
Mike and Sammy's	<input type="radio"/>				
Cold Cream	<input type="radio"/>				
Homemade	<input type="radio"/>				

Because this is the most common and best use of grid question types it is important to note how grid question types display on mobile. Grid questions will be displayed one grid row per page. This will reduce horizontal scrolling trouble as well as problems survey respondents typically experience trying to select the correct option.
