Add Colors and a Logo to Your Survey Header

Are you looking to add a header at the top of your survey, perhaps with your logo and brand along with your survey title? Not all of our pre-built themes and color palettes highlight the header, but customizing your survey to do so is easy!

Add a Header

1. If you have selected either a *Pre-Built Theme* or *Quick Color Scheme* palette that does not highlight the header as much as you would like, click the **Header** thumbnail on the left to access the header color palette.

LOGO	1. How satisfied are you with our p	products and services?	
	Very Dissatisfied	Dissatisfied	Neutral
No Image	0	0	0
BACKGROUND			Next
PAGE			0%
HEADER			

2. Select a different color for your header. Be sure to click **Apply Changes** once you have selected the perfect color.

Adjust Header Width

Some header containers will match the width of the page, others will match the width of the survey.

Customors					
Customer S	urvey				
1. How satisfied are you with our p	products and services?				
1. How satisfied are you with our p Very Dissatisfied	products and services? Dissatisfied	Neutral	Satisfied	Very Satisfied	

- 1. To customize this go to Layout > Widths / Sizing.
- 2. Here, you can adjust the **Page width**. Consider the **Page content width** as well to get the header look and feel you desire.

3. You can also take advantage of the **Space above the header** if you wish to separate it from the overall page.

Add a Header Logo Image

Are you looking to add your logo or another image to the top of your survey?

1. Click the Logo thumbnail to get started.

	Customer S	urvey		
LOGO No Image	1. How satisfied are you with our p Very Dissatisfied O	roducts and services? Dissatisfied	Neutral	Satisfied
PAGE			Next	

2. Click the Add Image Link to select an image. You have a few options for this:

a Image URL			
Choose image file from	n your file library.		
Upload image file		searc	h Q
No Image	Sample Logo	crying	big frown
8	(::	
small frown	neutral face	small smile	big smile

- **a.** If your image is hosted online, you can paste the image url into the **Image URL** field instead of uploading the image to your library
- b. Click Upload image file to upload a new image from your computer
- c. Choose images previously uploaded to your SurveyGizmo File Library
- 3. Once you have added your image, use the position and size controls as needed.

Logo		×
	Sample Logo	
	Remove / Change Image	
Position:	Left	¢
	•	

Header Image Sizes

For best results, we recommend header images of up to 750px wide and 200px tall.

If you would like your header image to display like a banner that stretches across the entire page, we recommend image files 1000px wide and 200px tall. To accommodate this image size, change your **Page Width** (available under **Style > Layout > Widths/Sizing**) to 100%.

- 1. To remove a header image, click the **Logo** thumbnail in the left panel.
- 2. Next, click the link to Remove / Change Image.

Logo		×
	Sample Logo	
	Remove / Change Image	
Position:	Left	\$
Size:	•	+

- 3. Finally, click the **No Image** option in the upper-left corner!
- 4. Be sure to click Apply Changes when you are finished.

Adjust Header Image and Survey Title Alignment

To adjust the header image position, follow these steps:

1. Click the Logo thumbnail and select left, right or center in the Position dropdown menu.

Logo		×
	Sample Logo	
	Remove / Change Image	
Position:	✓ Left Center Right	÷
Size:		

2. Be sure to click Apply Changes when you are finished.

To adjust the position of the survey title, click **Text > Text Options** and select left, right, or center in the dropdown menu to the right of the **Show Survey Title** option.

ENG 🗞	> Header Text	×
	> Body Text	
	✓ Text Options	
	Back Button Text	Back
BACKGROUND	Next Button Text	Next
PAGE	Submit Button Text	Submit
HEADER	Customize	e Messages & Text
BUTTON/ACCENT	Show Survey Title	✓ Left ÷ Center
	Show Page Titles	Right
TEXT	Show Page Description	ons
AA	Show Question Numb	bers
LAYOUT	Show Required Aster	isks

You may notice that the header image and survey title will be stacked one on top of the other. This might not be exactly what you were looking for. If you prefer to have both your image and survey title on the same line, you will need to use a little CSS code.

To do so scroll to the bottom of the survey preview and click **HTML/CSS Editor** link paste one of the below codes in the field on the **Custom CSS** tab.

Left align header image:

```
.sg-header-image{
float:left;
padding-left: 10px;
}
```

Right align header image:

```
.sg-header-image{
float:right;
padding-right: 10px;
}
```

Want Two Header Images?

Do you have two images? No worries, we've got you covered!

- First, get the links for both images. If the files are located in our File Library, go to Account > Libraries > File Library.
- 2. When you click on an image, you will see the **File URL** of the image. Copy this and paste it someplace where you can come back to it later. Repeat this step for the second header image.

Image Preview	Sample Logo
File URL:	// library.s3.amazonaws.com/library/ /: Logo.r
Embed Code:	</img
	Never Mind Download Image

- **3.** Now go back to the survey you want to edit and then click **Style** and scroll to the bottom of the survey preview and click **HTML/CSS Editor** link.
- 4. You will be editing both the HTML and CSS of your survey theme. Let's start with the HTML.
- 5. Go to the **Custom HTML** tab. You need to replace the sg-header-image code with these two pieces of code, where you replace the two links inside these examples with the links to your images that you copied earlier.

lass="wrapper" liv class="head	er">			
cally claces "Lite	header-hook-1">	c/div>		
<img "<="" class="" td=""/> <td></td> <td></td> <td></td> <td><pre>>library.s3.amazonaws.com/libs library.s3.amazonaws.com/libs</pre></td>				<pre>>library.s3.amazonaws.com/libs library.s3.amazonaws.com/libs</pre>
		<pre>class=" -header-hook-2";</pre>	<pre>class="header-hook-2"></pre>	[cempiace(survey cicle)]

You can adjust the size of the header images by putting in different values for the width=50% parameter. Don't go over 100% as it will cause your images to become pixelated.

Now, go to the **Custom CSS** tab and paste the following code. You can see that image 1 will float to the left and image 2 will float to the right. You can adjust these as needed.

```
.sg-header-image2 {
  float:right;}
.sg-header-image1 {
  float:left;}
.sg-header {
   overflow:hidden;}
h1.sg-title {
     clear: both;
}
```

Once you're done, click **Save Changes** and see how it looks!
