# **Style Your Report**

Do you need for your survey's report to correspond with your brand or perhaps your client's brand? You're in the right place; this tutorial covers the style options available in the Standard Report.

The Standard Report offers a number of style options for you to completely control the look and feel of the report. To get started, click the **Report Style** option in the left-hand panel of your Standard Report.

### Themes

Get started styling your Standard Report by checking out our Pre-Built Themes. Navigate to **Report Style > Theme > Pre-Built Themes** and click a theme thumbnail to see it applied to your report.

Note: Applying a Pre-Built Theme to your report will update every visual aspect of the report, including changing the fonts, chart colors, and size of the text.

# Logo

If you wish to include your brand's (or your client's) logo at the top of your Standard Report go to **Report Style > Logo** and click **Add Image**. There are several options for adding a logo:

- Select an image that has been previously uploaded to yourFile Library
- Upload an image directly via the **Upload image file** button
- If your image is hosted online, add it to the report via the **mage URL** field. Paste the image link/url into the field and click **Insert Image** to finish.

Size	0

After adding your image, use the **Position** drop-down to set the image position as **Left, Center,** or **Right**. If you need to adjust the logo's size, use the **Size** slider to either increase or decrease the size.

# Background

Click the **Background** option in the left-hand panel of your Standard Report to change the background color of the report. You can choose from our quick colors, use the color wheel, or enter a specific HEX Code if you have it handy.

In addition, SurveyGizmo can grab colors from either an uploaded image or a

website. Use the **From Image** or **From Webpage** options to provide a color source for the background of the report.

# Chart Colors

Click **Chart Colors** in the left-hand panel of your Standard Report to get started customizing the colors that are used in the charts throughout the report.

#### Pre-built Color Sets

Under **Pre-built Color Sets**, there are color palettes galore. Be sure to scroll down to see all of the options. You can select a quick color palette that you like and then go to the **Chart Colors** section to further customize by adding, removing or adjusting the existing colors in that palette.

#### **Chart Colors**

Under Chart Colors you can customize to your heart's content.

#### Remove a color

If you wish to remove a color from being used in any of your charts, select it and click the **x remove color** link.

#### Add a color

To add a color select an empty cell in your current color list and then choose from our quick colors, use the color wheel, or enter a specific HEX Code if you have it handy.

#### **Reorder your colors**

Colors will be used in your charts in the order they are listed. If you wish to reorder your colors, click, hold and drag colors to the desired location.

### Custom CSS

Finally, if you know your CSS you can add your own custom styles to further customize the report look & feel, under **Report Options > Custom CSS** 

Edit Report		
Overall Options	Bulk Edit	Custom CSS
Custom CSS		
1 /* Write you 2	ur custom C	°S here *

For example, to remove the data labels associated with Standard Report Pie Charts (pictured below), use the following code:

```
.highcharts-data-label{
display:none;
}
.highcharts-data-label-connector{
display:none;
}
```

Save a Theme to Your Library

Once you get your report looking just right, you can save the theme for re-use across other projects.

- 1. Go to Report Style > Theme > Your Theme Library
- 2. Click the Save Current Style as a New Themeoption at the bottom of the Pre-Built Themes.
- **3.** Give your theme a name and click**Save**. Now your theme is saved for use in future reports!

Applying a Saved Theme to Your Standard Report

Once you have a saved theme you'll likely want to apply this theme to another Standard Report. To do so go to **Report Style** > **Theme** > **Your Theme Library** and select the Theme you wish to apply.
