

# Add a Print Option for Survey Respondents

There are a number of methods for providing your survey respondents with a copy of their response.

- You can use the Send Email action to [Email a Survey Respondent a Copy of Their Response](#) . Using this option the response details can be included in the body of the email or in a PDF or both.
- You can use the [Review Response](#) action to display the response details within the survey itself and include a link to download a PDF that respondents can then save or print.

In this tutorial, we'll cover a workaround that uses the [Review Response](#) action in combination with some simple HTML and JavaScript code to add a link for respondents to print from the survey itself.

This workaround is great for most of our customers but may require some tweaking to get it right. If you have a solution that works better please let us know!

## Setup

1. Start by setting up a [Review Action](#) on the page to show all answered questions. If you'd like to include the entire survey, be sure to set up the Review Action and the Print option on the [Thank You page](#) of the survey.
  2. Click **Add New Text/Media** to follow the **Review Action**.
  3. Select **Text / Instructions** and click into the field and select the **Full Mode** button (...) in the editor toolbar.
-

4. Then click the **View Source** button in the editor toolbar.

5. Now you are ready to copy and paste the below code. Feel free to adjust the *click here* text as needed.

[Click Here to Print or Download to PDF](#)

6. Next, add a **JavaScript Action** to follow this text/instruction element and paste the below JavaScript code.

```
$(document).ready(function() {  
  $("#printButton").click(function() {  
    window.print();  
  });  
});
```

Once this setup is complete a link to print will display below your Review Action:

Review Response

1. The sun rotates around the earth.
  - False
2. The center of the earth is very hot
  - True
3. All radioactivity is man made.
  - False
4. It is the father's gene that decides whether the baby is a boy or a girl
  - True
5. Lasers work by focusing sound waves.
  - False
6. Electrons are smaller than atoms.
  - True
