

# Enter Response Data from In-Person/Paper Surveys

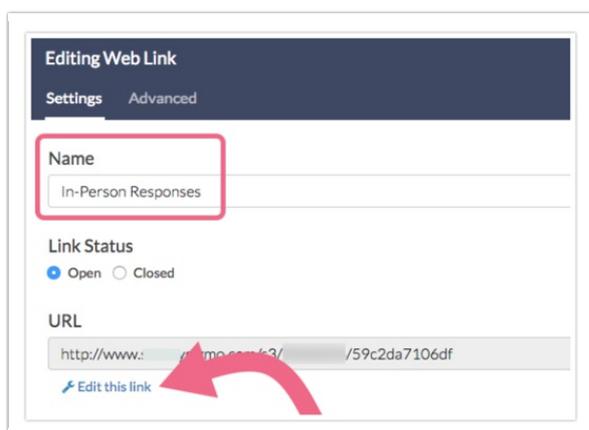

Have you collected in-person or paper survey responses that you wish to enter into SurveyGizmo for reporting? You can manually enter responses collected from the in-person interviews using a web link available on your **Share** tab.

We recommend creating a separate survey tracking link to record the in-person interviews, which will allow you to filter and segment your reports. You'll be able to report all the responses in aggregate, but you'll also be able to create filtered reports for online responses versus in-person (there may be some differences).

1. You can create a new web link on the **Share** tab by clicking the button to **Create New Tracking Link** found within the **Email Campaigns and Source Tracking** section.

2. As a best practice customize the link itself by clicking **Edit this link**, as well as, the link **Name**.

3. When you are finished, click **Done** and **Save Link**.

Settings Advanced ♥ Need Help?

Name  
In-Person Responses

Link Status

If you have a lot of responses, you can also import responses in bulk from a .csv file (but you'll have to put the paper responses into this format first). Check out our [Data Import Tutorial](#) to learn more!
