Add a Quiz Score Action to Any Project

If you create a Quiz from your dashboard a quiz score action will be automatically included (the default quiz type is Answer Key but you can toggle to a Tally). If you already have a survey built out with the questions you'd like score, don't panic; you can add a quiz score by clicking the Action button at the bottom of any page.

You can also add a Quiz Score action on a page in your survey that *follows* the questions you wish to evaluate. In fact, if you'd like you can set up *multiple quiz scores* if you wish.

1. Click **Add New Action**.
2. Select **Quiz Score**.
3. Select quiz score type: **Pass/Fail** or **Tally.**
4. Proceed to Pass/Fail Quiz Score Setup or Tally Quiz Score Setup.
