

Hide After Answering

At times you may want to discourage your survey respondents from changing their answers. SurveyGizmo has a feature that will help you accomplish this by automatically hiding a question once it is answered. This can be particularly helpful if you are using SurveyGizmo to create a Quiz.

Note: This feature is only available for the Radio Button Question Type.

Hiding an Answered Question

1. Edit the target question you wish to hide after it is answered.
2. Go to the **Logic** tab and click the **After answering, hide this question** option.
3. Save the Question, it's that easy!

Radio Buttons

Question Logic Validation Layout Piping / Repeat ♥ Need Help?

Logic Rule

Only show this question based on answers to previous questions or other logic conditions

After answering, hide this question

Hide this question by default (mainly used with custom scripting)

Only show this question to admin users

Disable Question

Yes

No

Alias

Concise name for scripting and reporting

SPSS Variable Name

Randomization Logic

Always include this question when showing a random selection of questions on this page

[Add Another Question](#) [Save Question to Library](#) [Never Mind](#) [Save Question](#)

With this setting applied, the questions will hide directly after an answer is selected. It may be helpful to add a note to your survey alerting your respondents of this behavior so they are not caught off guard.
