

# Importing Surveys From Other Survey Platforms

We do not have a tool to import a survey directly from another survey tool into SurveyGizmo. You can, however quickly rebuild your surveys by cutting and pasting your questions and answers into SurveyGizmo. [Learn how to Create a Survey in SurveyGizmo](#) .

## Import Response Data

If you have response data from other surveys that you wish to have available for reporting in SurveyGizmo you can use our [data import tool](#) to import your existing response data (from a spreadsheet) into your new SurveyGizmo surveys.

*The data import tool is available for paid plans only.*
