

Turn HTML Editor On or Off in Text Fields and Question Titles

Your SurveyGizmo surveys are really just HTML web pages, and being HTML web pages, any formatting you want to apply must be done in the appropriate web languages (HTML and CSS).

Thankfully, many of the text fields in SurveyGizmo will automatically load a visual/WYSIWYG (what you see is what you get) HTML Editor for your text formatting needs. By using the toolbar along the bottom of the text field, you can apply visual changes to your text, without having to know a lick of HTML!

The screenshot shows a text field titled "What question do you want to ask?" with a checkbox labeled "Require this question". Inside the text field, the text "Some text in bold" is visible. Below the text field is a toolbar with various formatting options: Bold (B), Italic (I), Size (dropdown), Color (A), Bulleted List, Numbered List, Merge Codes (dropdown), and a More options menu (three dots).

Note: This toolbar will **not** be visible until you click into the text field.

Common Keyboard Shortcuts

While you can certainly use the options available in the HTML editor menu to format your text, most of the common formatting options have associated keyboard shortcuts to help you perform these tasks:

	Mac Command	Windows Command
Bold formatting	Command (⌘)+B	Ctrl+B
<i>Italics</i> formatting	Command (⌘)+I	Ctrl+I

Underline formatting	Mac Command	Windows Command
Open the Link dialog window	Command (⌘)+L	Ctrl+L
Cut a text fragment to clipboard	Command (⌘)+X	Ctrl+X
Copy a text fragment to clipboard	Command (⌘)+C	Ctrl+C
Paste a text fragment from clipboard	Command (⌘)+V	Ctrl+V
Undo operation	Command (⌘)+Z	Ctrl+Z
Redo operation	Command (⌘)+Y	Ctrl+Y

Turn the HTML Editor On or Off

Though you can still [access the raw HTML](#) with the HTML Editor enabled, some users may find those two extra clicks *every time* they want to edit a piece of HTML to be a hassle. To turn the HTML Editor on or off, simply go to **Account > Summary > My Preferences** and looking for the option to **Use HTML Editor when Editing Questions**.

HTML Editor
☐ Use HTML Editor when Editing Questions

With the HTML Editor off, you will no longer see and interact with the "rendered" preview of your markup, but the actual HTML markup itself. Happy coding!

What question do you want to ask?

`Some text in bold`

Note: Turning this off will only affect text fields on the Build tab. The HTML editor will still be available within [Email Campaigns](#).

Limitations

If you paste HTML containing the `font-size` attribute into SurveyGizmo, this attribute will be stripped out from your HTML as it is not supported by modern web browsers. Font changes should be performed via your survey's [Style](#) tab.
