

# Add N/A Option to Sliders & Slider Lists

Looking to add a Not Applicable option to your [Slider](#) or [Slider List](#) question? We have it!

## Setup

1. To enable the Not Applicable option, check the **Include a not applicable option** checkbox located in the **Slider Settings** on the slider **Question** tab.

2. After checking the box, you will see an option to customize the **Not Applicable Label**. This is the text of the not applicable checkbox that will be displayed to your respondents.

Not Applicable

☒ Include a not applicable option

Not Applicable Label

Not Applicable

3. Make sure to **Save** your question when you are finished with your customizations.

## Reporting and Exporting

Within [Individual Responses](#) whatever you specify as your **Not Applicable Label** will display.

**Response #1**

Submitted: Nov 28, 2018 3:46 pm [Add Tag to Response](#) [Share](#) [Comments](#)

**New**

**1. (untitled)** [Edit](#)

1. On a scale of 1 - 10, please indicate your level of satisfaction with our products and services:

Not Applicable

In [Standard Reports](#), a count of respondents who selected Not Applicable will display below the [Histogram](#).

Finally, the reporting value "not applicable" will show in exports. At this time this value cannot be customized.

## Limitations

- The NA option in Slider and Slider List questions cannot be used to drive logic at this time.

- The NA option in Slider and Slider List questions will not be available in piping.
- The NA option in Slider and Slider List questions will not appear in Offline surveys.
