

Copy Survey and Import Data

SurveyGizmo gives you the tools to **Copy** your survey and to use the **Data Import Tool** to import the original survey's data into the copy. This can be accomplished by using the following features:

- [Export Raw Data to Excel](#)
- [Copy a Survey](#)
- [Import Data into Your Survey](#)

Follow these steps to copy a survey and bring over the data:

1. Export Data

Access the survey that you wish to copy and [export](#) the survey data via the **CSV/Export** option. Click on **Results > Exports** and select **CSV/Excel**. Once you have run your export in SurveyGizmo, download it as a CSV file.

2. Copy your Survey

Navigate to your home page and copy your survey. There are a couple of options for [copying your survey](#).

3. Import Data into Copy

Now that you have copied your original survey, you will need to access the copy and navigate to **Tools > Import Data**. You will be using the [Data Import Tool](#) to upload the CSV/Excel file that you downloaded in Step 1 into the copied survey.

Review the Data Import Supported Question Types [here](#).

Choose your file's CSV delimiter and select your file (this is the file that you downloaded in **Step 1**). Click **Upload Data**

Import Data

CSV delimiter
 , comma

Select a CSV file to import
 Select file... 20150623133434-SurveyExport.csv

 [Upload Data](#)

Click on **Suggest Matches** - this will allow SurveyGizmo to try to match up your file's column headers with the available questions in your copied survey.

BUILD STYLE TEST SHARE RESULTS TOOLS

Import Data

Map Fields

Associate the fields from your upload on the left to questions from your project on the right

| CSV Column | Survey Questions |
|--------------|------------------|
| Response ID | -- |
| Time Started | -- |

 [Suggest Matches](#)

Review the matches and manually match up any questions that the tool was not able to automatically. Click **Preview and Import**. Last, click **Upload Data**.

You are all done! Your copied survey should now contain the data that was downloaded from the original survey - giving you two versions of the survey with data.
