

Adjust Height of Vertical Slider

Are you using the vertical layout option for the Slider question type? Find that the default height is just a little too small? Never fear! You can adjust this with a little CSS!

How happy are you?

Unhappy

Copy and paste the below CSS code in your survey's theme. To do so, go to the **Style** tab and scroll to the bottom of the survey preview to access the link to the **HTML/CSS Editor**. CSS code should be placed on the **Custom CSS** tab. Then just adjust the pixels to the height you desire!

```
.sg-body .ui-slider-vertical {  
height: 400px;  
}
```

Seeing Something Different?

*All styling tutorials contain steps to achieve look & feel customizations using the improved theme designer that was released in November 2014. As of November 2015, the old theme designer has been deprecated. If you seeing something different than the tools covered below this means that you are using a Legacy Theme within Legacy Theme Designer. It's time to make a switch! To do so, go to **Style > Customize Theme** and click the link to **Try The New Theme Designer** to access the current theme interface.
