# Return Respondents to the Beginning of the Survey

There are a number of scenarios for which you might want to return survey respondents to the beginning of the survey so they can enter another response, e.g., 360 reviews, quizzes, etc.

You can set this up with a URL Redirect Action; it's pretty easy!

1. Start by copying your survey link on the **Share** tab.

2. Next, head over to the **Build** tab and scroll to the Thank You page and click the **Add New: Action** link at the bottom of the page and select **URL Redirect** from the **Add Action** screen.

3. Give your action a name (this is internal only). Paste your survey link In the **URL** field.
   - If you wish to have a brief delay before respondents are redirected enter it in seconds in the **Delay** field.
   - Click **Save Action** when you are finished.

Optional Customization

You might want to make your redirect conditional, say for example, when the respondent indicates that they wish to record another response.

1. To set this up, first, add the question you wish to base the redirect off of.

2. Next, edit your URL Redirect Action and go to the **Logic** tab. Select **Only show this action based on answers to previous questions or other logic conditions** and complete the logic condition for when you wish to have respondents redirected.

Edit Action

Logic Rule

☑ Only show this action based on answers to previous questions or other logic conditions

Remove All Logic

| Q Would you like to submit another re ⇕ | is one of the follc ⇕ | ☑ Yes |
| | | ☐ No |

+ Add Condition

Check it out in an example survey!
