

Quick Sort Question Type

The Quick Sort question type is interactive and allows respondents to categorize options by clicking and dragging **Items** into **Groups** of your choosing.

Once a respondent places an item into a group, the item is no longer visible and thus cannot be moved from one group to another.

To indicate whether a Group contains Items, a count will be displayed to the respondent in the lower-left corner of each category.

SurveyGizmo offers three versions of the Grouping (Card Sort) question:

1. Quick Sort- Respondents categorize items that you have specified into predetermined groups. After being placed into a group, items are no longer available to be rearranged. This tutorial covers this version of the question.
2. [Grouping \(Closed Card Sort\)](#) - Respondents categorize items that you have specified into groups (categories that you have created).
3. [Grouping \(Open Card Sort\)](#) - Respondents create their own groups in order to categorize items you provide.

When to use it

Use the Quick Sort question when asking your respondents to place options into categories. In the Quick Sort question, the items and groups are determined by you as the survey builder.

A screenshot of the SurveyGizmo interface demonstrating the Quick Sort question type. On the left, a list of items includes 'Actions', 'Response Settings', 'Survey Links', 'Themes', 'Data Cleaning', 'Individual Responses', and 'Reports'. On the right, categories are listed with input fields: 'Home Page', 'Build' (with a count '1'), 'Style', 'Test', 'Share', 'Results' (with a count '2'), 'Email Campaigns' (which is highlighted), 'Tools', and 'Advanced'. A callout box on the right says 'Check it out in an [example survey](#)! Add a survey with this question to your account!'.

Compatibility

- This question is not compatible with Internet Explorer 8 and below.
- This question is not screen reader accessible.

Setup

1. Click the **Question** link on the page where you would like to add the Quick Sort question.
2. Select **Quick Sort** from the **Question Type** dropdown and enter your overall question text.
3. Enter your **Group** names, these are the categories into which respondents will be placing your items. There will be 2 default group fields. You can delete these or customize them to get started.

4. Next, enter your **Item** names. These are the options that your respondents will be dragging/placing into the groups that you created in the previous step. There will be 2 default item fields. You can delete these or customize them to get started.

Items can be text or images. Images can be added via the add image icon highlighted below.

Layout Options

On the **Layout** tab, you can adjust how your **Items** are initially presented, as well as how they are displayed once placed into a **Group**.

Grouping (Open Card Sort)

Question Logic Validation **Layout** Piping / Repeat

Layout

Show all items/cards
 Only show one item/card at a time

Number of Columns

By default, all available Items are displayed to the survey respondent. If you prefer to show only one item to your respondents at a time, select **Only show one item/card at a time**. This will result in the following configuration:

Number of Columns

Depending on the number of groups that you have created, you may choose to adjust how many groups are displayed per row. Adjust the **Number of Columns** option to select the number that best suits your display needs.

Customize Question Instructions

SurveyGizmo provides the following default instructions for the Quick Sort question: "**Drag items from the list below into the appropriate categories.**"

1. If you prefer to provide your own custom instructions, the default text can be edited. Go to **Tools > Text & Translations**. Select the language where you want to make this text change and select the **Messages** section.
2. Locate the item labeled **Card Sort Instructions** and edit the item to provide your own custom instructions. You can also update the text seen by respondents when there are no more available items to categorize. **Empty** is the default text provided by SurveyGizmo.

Survey Taking

The Quick Sort question displays like so on a desktop or laptop:

Please place each item in the category that appears best suited for the item.

Drag items from below into the appropriate categories.	Home Page	Build

Data Cleaning		
Reports		
Individual Responses		
Email Campaigns		
Actions		
	Response Settings	Results
	Tools	Advanced

When optimized for mobile devices the Quick Sort question is quite different as mobile screens are much smaller and dragging and dropping is more difficult. As you can see each item is displayed one at a time and the groups that you can "sort" into are displayed as answer options.

Quick Sort Question Type

Please place each item in the category that appears best suited for the item.
