Available Options for Pie Charts

There are a number of options available for an individual pie chart.

Filter Tab

First, if you wish to filter the data that displays for an individual pie chart, click **Filter** to the right of the element and use the logic builder. Learn more about [filtering an individual element](#) .

- If you wish to display the specific details of your filters below your chart, check the **Show Details of Filter with Report Element** checkbox below the logic builder.
- You will also see an option to filter this element by **Survey Link or Campaign**. This filter option will allow you to only include data in this element that was collected via a specific link (or links).

The screenshot shows the 'Edit Report Element' interface with the 'Filter' tab selected. The interface includes a logic builder with a dropdown menu for conditions, a comparison operator 'is exactly equal', and a text input field. Below the logic builder are buttons for '+ Add Condition' and '+ Add Group'. A checkbox labeled 'Show Details of Filter with Report Element' is checked. At the bottom, there is a button labeled '> Filter by Survey Link or Campaign'.

Chart Type Tab

Second, questions that default to display as a Pie Chart can also be displayed as a number of different chart types. Click **Chart Type** to the right of the element and select a different chart type from the available options.
