Recommended Header Image Size

When including an image as part of your survey header on the Style tab we recommend the below image sizes.

Header Images - we recommend images files up to 750px wide and 200px tall.

Banner Header Images - If you would like your header image to display like a banner that stretches across the entire page, we recommend image files 1000px wide and 200px tall. To accommodate this image size, change your **Page Width** (available under **Style > Layout > Widths/Sizing**) to 100%.

Learn about other recommended image sizes in our Recommended Image Size Tutorial .
