

# Standard Report: Report Options Vs. Layout & Options

The Standard Report allows you to make edits and changes in a couple of different ways, depending on the scope of the changes that you are looking to make:

1. Use the **Report Options** and **Bulk Edit Elements** tools to change settings for all elements in your report at once. Both of these options can be found in the upper right of your Standard Report.

2. Use **Layout & Options** to customize specific report elements on a case-by-case basis. This option is located to the right of any compatible report element.

Report Options

The Standard Report offers a multitude of overall report settings via **Report Options**. By default, all reporting elements use the overall settings of the Standard Report. Editing an individual element essentially overrides the overall report setting for that element only.

## Report Options > Layout

The following overall **Layout** settings are available:

### Filter Details

Filter Details are enabled by default and refer to the notification that is shown if a filter is applied to a specific report element.

Uncheck the **Filter Details** checkbox to remove these notifications for the entire report.

### Chart

Enabled by default, Charts refer to the graphical elements in the Standard Report, such as Pie Charts, Bar Charts, etc. Uncheck the **Chart** checkbox to hide charts for the entire report. Report elements will display with only the Summary Table as a result.

## 2. Age Group

Value	Percent	Responses
18-24 years-old	12.9%	18
25-34 years-old	30.0%	42
35-44 years-old	27.9%	39
45-54 years-old	15.7%	22
55-64 years-old	9.3%	13
65 years or older	4.3%	6
		Total: 140

- Chart Type
- Filter
- Layout & Options
- Move
- Delete

## Word Cloud

Word Clouds refer to the default reporting element for open ended questions. They are enabled by default.

9. Please share your feedback with us!

- Chart Type
- Filter
- Layout & Options
- Move
- Delete

Uncheck the **Word Cloud** checkbox to hide all word clouds in your Standard Report.

## Summary Table

Summary Tables refer to the tables that are found as part of most reporting elements. Tables are located directly below the charts and offer a more detailed view of the question's data. Tables are enabled by default.

Value		Percent	Responses
18-24 years-old		12.9%	18
25-34 years-old		30.0%	42
35-44 years-old		27.9%	39
45-54 years-old		15.7%	22
55-64 years-old		9.3%	13
65 years or older		4.3%	6
			Total: 140

Uncheck the **Summary Table** checkbox to remove these tables in your entire report, leaving only the charts for each element.

### Statistics Table

The Statistics Table displays compatible statistics for reporting elements. Statistics provided include **Average** and **Standard Deviation**. Learn more [here](#) . The Statistics Table is disabled by default.

\$125,000 to \$149,999		13.0%	23			
\$150,000 or more		11.3%	20			
			Totals: 177			
<hr/>						
Min	Max	Sum	Average	StdDev	Skipped	Total Responses
0	7	636.0	3.6	2.2	23	177

Check the **Statistics Table** box to include these table for all compatible elements in your report.

### Questions With no Data

The Questions With no Data setting allows you to control whether you want to display questions that have not collected any data on your survey. By default, questions with no data will be displayed in your report. Toggle this setting to remove all questions with no data in your Standard Report.

### Use Question Alias as Title

The [Question Alias](#) feature allows you to create short names for your survey's question titles (this is particularly useful for reporting purposes if your question titles are long).

The **Use Question Alias as Title** setting allow you to use these short names as titles in your report. Check this setting to use Question Aliases for all reporting elements (provided that an Alias was configured on your survey's Build tab). This option is disabled by default.

## Question Numbering

By default, the reporting elements in your Standard Report will be numbered starting with 1. You have the option to turn off numbering in the report by selecting **No Numbers**. If you have customized the numbering of your survey and want to carry that over into your report, select the **Original Question Number From Survey** option. Last, you have the option to convert numbering into lettering, beginning with the letter **A**.

### Question Numbering

- No Numbers
- Original Question Number From Survey
- 1, 2, 3, ...
- A, B, C, ...

## Open Text

By default, data collected via open ended text questions displays as a [Word Cloud](#) combined with a [Collapsed Response List](#) .

Under the **Open Text** section of the Overall Options, you can elect to **Show Open Text Answers by Default** for your entire Standard Report. This will result in all of the Collapsed Response Lists being expanded by default for all elements.

313 Total Responses | Hide Responses ▾

Count	Response
1	Adventures, till she was about a thousand times as large as himself, and.
1	Alice (she was.
1	Alice angrily. 'It wasn't very civil of you.
1	Alice asked in a large ring, with the words came very queer indeed:-- "'Tis the voice of thunder, and.

## Report Options > Answer Options

The following overall settings are available via the **Answer Options** section.

### N/A Options

If you have applied the [Answer Option Special Setting](#) of Not Applicable to one of your answer options, you can elect to exclude both this answer option and any associated data from your entire Standard Report.

N/A Options are included by default. Toggle this setting to remove these from your report.

### Response Counts and Checks

Response Counts and Checks are included as part of the Summary Table for each reporting element.

Neutral		16.8%	30
Satisfied		19.0%	34
Very Satisfied		15.6%	28
			Totals: 179

Uncheck the **Response Counts and Checks** checkbox to remove this count from all

elements in your Standard Report.

### Answer Options/Rows With No Data

By default, any answer options that have not collected data will be omitted from your Standard Report. If you prefer to have these included, check the **Answer Options/Rows With No Data** box.

Value	Percent	Responses
Less than \$25,000	0.0%	0
\$25,000 to \$34,999	0.0%	0
\$35,000 to \$49,999	0.0%	0
\$50,000 to \$74,999	0.0%	0
\$75,000 to \$99,999	100.0%	1

### Answer Options Names

The Standard Report will display the **Original Option Titles** within reporting elements by default. If you have [customized your reporting values](#) to be unique of your answer option titles and want to display the reporting values in your report, toggle this setting to **Reporting Values**.

### Order Answers By

An answer option within your reporting elements will be displayed in the **Original Order it Appeared in the Survey** by default. You can toggle this setting to show answers based on the **Number of Response (Highest to Lowest)** or **Alphabetically**.

**Order Answers By**

Number of Responses (Highest to Lowest)

Original Order it Appeared in the Survey

Alphabetically

### Decimal Places

All percentages in the Standard Report are shown with 1 decimal point by default. Toggle this setting to either **0** (no decimal points) or **2** decimal points.

## Report Options > Charts

The following overall settings are available via the **Charts** section.

### Chart Size

The default chart size for Standard Reports is **Medium**. Toggle this setting to **Small** or **Large** depending on your preference.

#### Chart Size

Small

Medium

Large

Note: Charts will resize to fit to smaller screens.

### Axis Values

By default, charts in the Standard Report show axis values as a percentage. If you prefer to see axis values as counts, toggle **Option Percents** to **Option Counts**.

### X-Axis/Y-Axis Value Bounds

Use these fields to set the *limits (min & max)* of your x/y-axes for compatible report elements.

---

**X-Axis Value Bounds**

min  max

**Y-Axis Value Bounds**

min  max

Available for the following chart types:

- [Vertical Bar Chart](#)
- [Horizontal Bar Chart](#)
- [Line Chart](#)
- [Spline Chart](#)
- [Area Chart](#)
- [Area Spline Chart](#)

### **Group Piped/Repeated Charts by**

If you are utilizing Question Piping or Page Piping in your survey, you will see your piped/repeated questions segmented by default. These segments will be grouped based on the **Source Option** by default. You have the option to group based on the **Target Option** instead. Learn about the differences between these options [here](#) .

## Report Options > Grid-Type Questions

The following overall settings are available via the **Grid-Type Questions** section.

### **Row Total**

The Row Total refers to the number of responses per a given row of a grid question. This is not displayed by default, but can be toggled on for all grids in your report by checking the **Row Total** box.

---

Please rate your level of satisfaction with the following:

	Very Dissatisfied	Dissatisfied	Neutral	Satisfied	Very Satisfied	Responses
Customer Service						
Count	50	37	49	43	51	230
Row %	21.7%	16.1%	21.3%	18.7%	22.2%	
Product						
Count	46	51	44	43	62	246
Row %	18.7%	20.7%	17.9%	17.5%	25.2%	
Totals						
Total Responses						368

## Row Average

The Row Average displays an average value calculated across all answer options in a given row. The average will only be available if numeric [reporting values](#) have been defined for the grid columns. Row averages are not displayed by default but can be enabled for all grids in your report by checking the **Row Average** box.

Please rate your level of satisfaction with the following:

	Very Dissatisfied	Dissatisfied	Neutral	Satisfied	Very Satisfied	Average
Customer Service						
Row %	21.7%	17.5%	21.4%	19.1%	20.4%	3.0
Product						
Row %	18.1%	19.9%	19.0%	19.3%	23.7%	3.1

## Column Total

Column Total refers to the number of responses for a given column in a grid question. Column totals are not enabled by default but can be displayed for all grids by checking the **Column Total** box.

	Very Dissatisfied	Dissatisfied	Neutral	Satisfied	Very Satisfied
Customer Service					
Row %	21.7%	17.5%	21.4%	19.1%	20.4%
Product					
Row %	18.1%	19.9%	19.0%	19.3%	23.7%
Totals					
Total Responses					
Column Total	125	118	127	121	139

## Column Average %

The Column Average % displays an average value (as a percentage) calculated across all answer options in a given columns. Column averages are not displayed by default but can be enabled for all grids in your report by checking the Column Average % box.

	Very Dissatisfied	Dissatisfied	Neutral	Satisfied	Very Satisfied
<b>Customer Service</b>					
Row %	21.7%	17.5%	21.4%	19.1%	20.4%
Column %	53.6%	45.8%	52.0%	48.8%	45.3%
<b>Product</b>					
Row %	18.1%	19.9%	19.0%	19.3%	23.7%
Column %	46.4%	54.2%	48.0%	51.2%	54.7%
<b>Totals</b>					
Total Responses					
Column Total	125	118	127	121	139
Column Avg. %	19.8%	18.7%	20.2%	19.2%	22.1%

## Custom Table Subquestions

If you have collected data via the Custom Table question type, this data will be displayed via the **Order by Row** configuration. You have the option to toggle this to **Order by Column** instead. Learn about the differences [here](#) .

## Report Options > Report Language

The **Report Language** section allows you to choose a language for your Standard Report, provided that you have incorporated translations into your survey via the [Text & Translations](#) interface.

## Report Options > Crosstab

There are a number of overall settings that can be applied to all Crosstab elements within a Standard Report. These settings are covered in detail [here](#) .

## Bulk Edit Elements

The **Bulk Edit** settings can be accessed from the upper right of your Standard Report.

---

## Bulk Edit > Element Title

Using the **Bulk Edit** tool, you can quickly change titles for a number of your reporting elements. Simply click on an existing element title and update the text.

Edit Report

Overall Options Bulk Edit

### Bulk Edit > Bulk Remove

Use the **Bulk Remove** option to quickly delete multiple reporting elements.

The screenshot shows the 'Edit Report' interface with the 'Bulk Edit' tab selected. Below the header, there is a section titled 'Included Report Elements' containing a table with the following columns: 'Element Title', 'Chart Type', 'Element Type', and 'Bulk Remove'. The table lists eight report elements, each with a corresponding chart type and element type. The 'Bulk Remove' column contains a red 'x' icon for each row, indicating the option to delete the element.

Element Title	Chart Type	Element Type	Bulk Remove
NPS	Table	Net promoter score	
What state do you currently live in?	Pie Chart	Radio buttons	
Income	Vertical Bar	Radio buttons

Add another report element

## Layout & Options (Individual Report Elements)

As mentioned above, all reporting elements use the overall settings of the Standard Report by default. Using **Layout & Options** settings, you can override the overall report settings for a given reporting element.

Many of the settings available for your entire report via **Overall Options** are available on a per element basis via **Layout & Options**. Note that depending on the element type, different options will be available.

If you update a reporting element via **Layout & Options**, you will see the following notification within that element:

**Edit Report Element**

Chart Type Filter **Layout & Options**

Element Options

This element is *not* using the report's overall options  
It is using only the settings below: [Reset to use the report's overall options.](#)

You will also see the following notification within the body of your Standard Report:

When an individual report element is flagged with this icon, any changes that you make to your Standard Report via **Overall Options** will not be applied to the element.

## Layout & Options > Question Options

The following element-specific settings are available via the **Question Options** section.

### Chart

Enabled by default, uncheck the **Chart** checkbox to hide the chart for a specific report element. This will hide things like Pie Charts, Bar Charts, etc.

### Summary Table

Summary Tables refer to the tables that are found as part of most reporting elements. Tables are located directly below the charts and offer a more detailed view of the question's data. Tables are enabled by default.

Value	Percent	Responses
18-24 years-old	12.9%	18
25-34 years-old	30.0%	42
35-44 years-old	27.9%	39
45-54 years-old	15.7%	22
55-64 years-old	9.3%	13
65 years or older	4.3%	6
		<b>Total: 140</b>

Uncheck the **Summary Table** checkbox to hide this table for the specific report element that you are editing.

## Statistics

The Statistics Table displays compatible statistics for reporting elements. Statistics provided include **Average** and **Standard Deviation**. Learn more [here](#) . Statistics are disabled by default.

Check the Statistics box to include this table for the specific reporting element that you are editing.

## Layout & Options > Answer Options

The following element-specific settings are available via the **Answer Options** section.

### N/A Options

If you have applied the [Answer Option Special Setting](#) of Not Applicable to one of your answer options, you can elect to exclude both this answer option and any associated data from a specific report element.

N/A Options are included by default. Toggle this setting to remove this from the specific element.

### Response Counts

Response Counts are included as part of the Summary Table for each reporting element.

Neutral		16.8%	30
Satisfied		19.0%	34
Very Satisfied		15.6%	28
			Totals: 179

Uncheck the **Response Counts** checkbox to remove this count from the specific element that you are editing.

### Answer Options With no Data (Rows With no Data)

By default, any answer options that have not collected data will be omitted from your Standard Report. If you prefer to have these included, check the **Answer Options With no Data** box.

Options with no data will be included in your element's Summary Table.

Value		Percent	Responses
Less than \$25,000		0.0%	0
\$25,000 to \$34,999		0.0%	0
\$35,000 to \$49,999		0.0%	0
\$50,000 to \$74,999		0.0%	0
\$75,000 to \$99,999		100.0%	1

### Answer Options Names

The Standard Report will display the **Original Option Title** within reporting elements by default. If you have [customized your reporting values](#) to be unique from your answer option titles and want to display the reporting values for a specific element, toggle this setting to **Reporting Values**.

### Order Answers By

An answer option within your reporting element will be displayed in the **Original Order it Appeared in the Survey** by default. You can toggle this setting to show answers based on the **Number of Response (Highest to Lowest)** or **Alphabetically**.

### Order Answers By

- Number of Responses (Highest to Lowest)
- Original Order it Appeared in the Survey
- Alphabetically

### Chart Size

The default **Chart Size** for any reporting element is **Medium**. Toggle this to either **Small** or **Large** depending on your preference.

### Axis Values

By default, charts in the Standard Report show axis values as a percentage. If you prefer to see axis values as counts for a specific element, toggle **Option Percents** to **Option Counts**.

### X-Axis/Y-Axis Value Bounds

Use these fields to set the *limits of your x/y-axis* for this specific report element.

#### X-Axis Value Bounds

min  max

#### Y-Axis Value Bounds

min  max

Available for the following chart types:

- [Vertical Bar Chart](#)
- [Horizontal Bar Chart](#)
- [Line Chart](#)
- [Spline Chart](#)
- [Area Chart](#)
- [Area Spline Chart](#)

## Layout & Options > Grid Options

The following Grid Options are available when working with [grid reporting elements](#)

### Row Total (Grid Questions Only)

The Row Total refers to the number of responses per a given row of a grid question. This is not displayed by default, but can be toggled on for a specific grid by checking the **Row Total** box.

Please rate your level of satisfaction with the following:

	Very Dissatisfied	Dissatisfied	Neutral	Satisfied	Very Satisfied	Responses
<b>Customer Service</b>						
Count	50	37	49	43	51	230
Row %	21.7%	16.1%	21.3%	18.7%	22.2%	
<b>Product</b>						
Count	46	51	44	43	62	246
Row %	18.7%	20.7%	17.9%	17.5%	25.2%	
<b>Totals</b>						
Total Responses						368

### Row Average (Grid Questions Only)

The Row Average displays an average value calculated across all answer options in a given row. The average will only be available if numeric [reporting values](#) have been defined for the grid columns. Row averages are not displayed by default but can be enabled a specific grid by checking the **Row Average** box.

Please rate your level of satisfaction with the following:

	Very Dissatisfied	Dissatisfied	Neutral	Satisfied	Very Satisfied	Average
Customer Service Row %	21.7%	17.5%	21.4%	19.1%	20.4%	3.0
Product Row %	18.1%	19.9%	19.0%	19.3%	23.7%	3.1

### Column Total (Grid Questions Only)

Column Total refers to the number of responses for a given column in a grid question. Column totals are not enabled by default but can be displayed for your grid by checking the **Column Total** box.

	Very Dissatisfied	Dissatisfied	Neutral	Satisfied	Very Satisfied
Customer Service Row %	21.7%	17.5%	21.4%	19.1%	20.4%
Product Row %	18.1%	19.9%	19.0%	19.3%	23.7%
<b>Totals</b> Total Responses Column Total	125	118	127	121	139

### Column Average % (Grid Questions Only)

The Column Average % displays an average value (as a percentage) calculated across all answer options in a given columns. Column averages are not displayed by default but can be enabled for a specific grid by checking the Column Average % box.

	Very Dissatisfied	Dissatisfied	Neutral	Satisfied	Very Satisfied
Customer Service Row %	21.7%	17.5%	21.4%	19.1%	20.4%
Column %	53.6%	45.8%	52.0%	48.8%	45.3%
Product Row %	18.1%	19.9%	19.0%	19.3%	23.7%
Column %	46.4%	54.2%	48.0%	51.2%	54.7%
<b>Totals</b> Total Responses Column Total Column Avg. %	125 19.8%	118 18.7%	127 20.2%	121 19.2%	139 22.1%

## Layout & Options > Question Options (Open Text Questions)

The following Question Options are available for open text questions.

### Word Cloud (Open Text Questions Only)

Word Clouds refer to the default reporting element for open ended questions. They are enabled by default.

Uncheck the Word Cloud checkbox to hide the Word Clouds in a specific element.

### Collapse Open Text Response Tables (Open Text Questions Only)

By default, data collected via open ended text questions displays as a [Word Cloud](#) combined with a [Collapsed Response List](#).

Under the **Question Options** section of **Layout & Options**, lists of open-ended responses are set to **Collapse Open Text Response Tables**. Uncheck this to have the

table expanded instead.
