

Master and Sub Accounts

Sub Accounts are available as an add-on. If you are interested in the Sub Accounts, please [contact us](#) for additional information.

Sub accounts are typically used for one of two reasons.

1. First, sub accounts can be used to manage surveys in a large organization.

Think of a national sports league, for example. The sports organization could have an overall master account and would be able to then create and manage sub accounts for all the teams. In doing so, they can control a number of aspects of the surveys that each team can build and distribute.

2. A second reason you might want to use sub accounts is to resell SurveyGizmo.

Sub Account Settings

Once you are set up as a master account there are a number of settings available for controlling your sub accounts. To access these settings go to **Account > User Management > Sub Accounts**.

You'll see a **Sub Account Overview** which shows the following information:

- **Total Active Users** - this is the number of users across all of your sub accounts
 - **Total Surveys** - total surveys across all sub accounts
 - **Total Active Sub Accounts** - you will see how many sub accounts you are using over the number you have available
-

Sub Account Overview			Edit Sub Account Settings
Total Active Users	Total Surveys	Total Active Sub Accounts	
3	8	3/10	

Create Sub Accounts							Columns ▾	Search <input type="text"/>
ID	Organization Name	Contact	Contact Email	Billing Email	Users	Usage		
123456	Boston Badgers	Nick	nick@bostonbadgers.com		1	None	Log In	
654321	Sacramento Silver Foxes	Paul	paul@sacramentosilverfoxes.com		1	None	Log In	
111111	Denver Devil Dogs	George	george@denverdevildogs.com		1	None	Log In	

[Download Account List](#)

You can create sub accounts yourself by clicking the **Create Sub Accounts** button within your master account under **Account > Sub Accounts**. You can also have sub accounts create their accounts themselves using a sign-up page.

Click **Edit Sub Account Settings** to make changes to the various settings that control your sub accounts.

Sign Up Page Settings

The Sign Up Page and the Login Page for sub accounts can be fully branded on the **Sign Up Page** tab available under the **Edit Sub Account Settings** link.

1. The **Sign Up Domain** dropdown menu will default to app.surveygizmo.com. This menu will also populate with any [private domains](#) or [subdomains](#) you have set up in your master account.
2. Once you've selected your **Sign Up Domain** your **Sign Up Page URL** and **Login Page URL** will reflect the domain you selected. These can then be shared with your sub account users.
3. You may also wish to add instructions for your sub account users in the **Sign up Instructions** field.

The screenshot shows the 'Sub Account Settings' interface. At the top, there are tabs for 'Sign Up Page', 'Contact', 'Billing', and 'Advanced', with 'Sign Up Page' selected. A 'Need Help?' link is visible in the top right. Below the tabs, there are three input fields: 'Sign Up Domain' with the value 'surveys.nationallacrosseleague', 'Sign Up Page URL' with the value 'https://surveys.nationallacrosseleague/subaccount/signup/i/xx0', and 'Login Page URL' with the value 'https://surveys.nationallacrosseleague/subaccount/login/i/xx0'. Each URL field has an eye icon for toggling visibility.

4. Finally, you can add a **Logo** and customize the colors of your sign up and login pages.

This screenshot shows the 'Sign up Instructions' section. It features a text area containing the instruction: 'You must sign up with your team email address e.g. email@devildogs.com or email@silverfoxes.com'. Below this is the 'Logo' section, which displays a circular logo with two crossed lacrosse sticks, three stars, and the word 'Lacrosse' at the bottom. Underneath the logo is the 'Colors' section, which includes three color swatches labeled 'Accent' (dark green), 'Form' (white), and 'Text' (dark grey).

Contact Settings

On the Contact tab customize your welcome email and support & documentation panel.

Within the **Welcome Message** field, you can customize the email message that will be sent to the email address associated with a new sub account.

Welcome To SurveyGizmo

Hello `[[contactemail]]`,

Congratulations, your SurveyGizmo account has been initiated and we would like to welcome you aboard!

You can login here: `[[passwordlink]]`

Below is the default message text. Text surrounded by double square brackets e.g., `[[contactemail]]` or `[[passwordlink]]` are merge codes that will dynamically populate for each recipient. DO NOT delete the `[[passwordlink]]` merge code from the message body as this is required to provide a working password reset link.

Welcome To SurveyGizmo

Hello [[contactemail]],

Congratulations, your SurveyGizmo account has been initiated and we would like to welcome you aboard!

You can login here:

[[passwordlink]]

(After you log in, you will be prompted to set a password. In the future, after you have a password, you can always login at [[baseurl]].)

Since you are new to SurveyGizmo, here are some resources that may help you get started:

Within the **Support & Documentation Panel**, set your support & documentation options.

Support & Documentation Panel

Contact Settings

Use SurveyGizmo support panel
 Custom support panel and links

Email:
 Phone:

Custom Help Documentation Link:

Use SurveyGizmo's recommended documentation links

Support Panel Message:

- **Use SurveyGizmo support panel** - this default selection will result in [SurveyGizmo's default Need Help](#) options being presented to users who click on **Need Help**.
- **Custom support panel and links** - this selection will allow you to override SurveyGizmo's default help option.
 - Input a custom support email address into the **Email** field.
 - Provide a custom support phone number in the **Phone** field.
 - Use the **Custom Help Documentation Link** to provide a link to your custom help documentation. Select the option to **Use SurveyGizmo's recommended documentation links** to have SurveyGizmo suggest help articles based on the page that Need Help is accessed from.
 - Last, the **Support Panel Message** field will allow you to customize the confirmation text that is displayed once a support ticket is submitted.

Billing Settings

On the **Billing** tab, you can set up how sub accounts are paid for, as well as, the default sub account license types.

Sub Account Settings

[Sign Up Page](#) | [Contact](#) | **[Billing](#)** | [Advanced](#)

Individual Billing

Bill each sub account separately
 Bill this master account for all sub accounts

Default Sub Account License Type

Annual Full Access License
 Annual Collaborator License
 Annual Professional License

- Sub accounts can be billed separately or billed to the master account.
- In addition to how sub accounts are billed, you can then select a **Default Sub Account License Type**. Choose from:
 - Collaboration
 - Professional
 - Full Access

Advanced Settings

On the **Advanced** tab, there are settings to further control your sub accounts.

Allowed Domain Settings

Using the **Allowed Domains** you can limit sub account signups to specific domains. Specify your domains in a comma-separated list.

Sub Account Settings

Sign Up Page Contact Billing **Advanced**

Allowed Domains

Limit signups to emails ending in the following domains (comma seperated)

yourname@ badgers.com,silverfoxes.com,devildogs.com

Account Approval Options

If you would like further control over sub account signups select **Before they can be used, accounts must be approved** under **Account Approval**. This will provide you with an email address

Account Approval

Anyone with an email ending in the allowed domains can create an account.

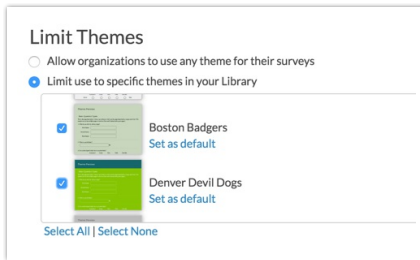

Before they can be used, accounts must be approved

sam@nll.com

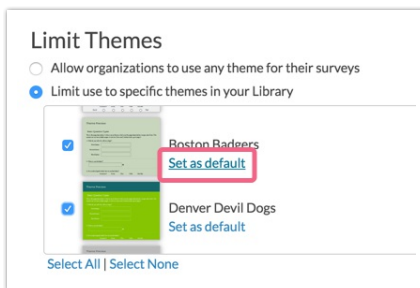

Limiting Themes

If you wish to limit the survey themes that a sub account can apply to their surveys select **Limit use to specific themes in your Library** under **Limit Themes** and select

the themes you wish to make available in sub accounts.

In addition to limiting Sub Accounts to only specific themes, you can determine a *Default Theme* that will be applied to each newly created survey within the Sub Account. To do so, click the **Set as default** link associated with a theme. Click the link again or set a different theme as default to un-set the default setting.

Password Rules

If you wish to enforce the [password security settings](#) you have set up in your master account select the option to **Enforce this master account's security setting on all sub accounts** under **Password Rules**.

Duplicate User Logins

Last, if users on the Sub Account already have other SurveyGizmo accounts associated with their email address (or if you want to allow them to use the same email with multiple accounts), make sure to check the setting to **Allow users of this account and all associated sub accounts to reuse email logins already associated with other SurveyGizmo accounts**.

If users do have multiple accounts with the same email address, our system will ask you which account you wish to login to. Simply click *Use this account* on the account

you wish to use, enter your password and click **Log In**. [Learn more!](#)

Managing Sub Accounts

Once you have your sub accounts up and running you'll be able to manage them under **Account > Sub Accounts**.

Here you'll see a **Sub Account Overview** which shows the Total Active Users and Total Surveys across all your sub accounts. Under Total Active Sub Accounts you'll see how many sub-accounts you are using over the number you have available.

Below the overview will be a list of all sub accounts along with their relevant contact and billing information. The **ID** field here is the Account ID # of the sub account. This sub account information can be downloaded via the **Download Account List** link found below the sub account list.

Sub Account Overview [Edit Sub Account Settings](#)

Total Active Users: **3** Total Surveys: **8** Total Active Sub Accounts: **3/10**

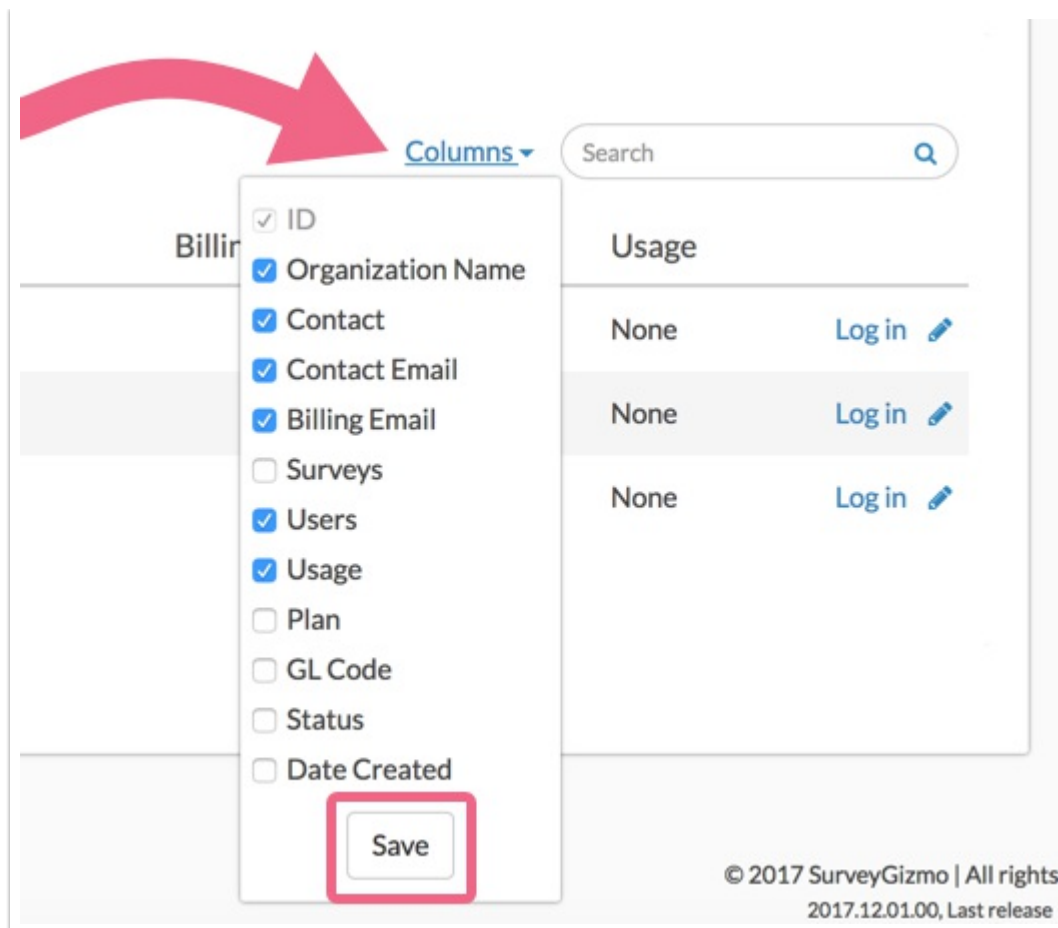

[Create Sub Accounts](#) [Columns](#)

ID	Organization Name	Contact	Contact Email	Billing Email	Users	Usage	
123456	Boston Badgers	Nick	nick@bostonbadgers.com		1	None	Log in
654321	Sacramento Silver Foxes	Paul	paul@sacramentosilverfoxes.com		1	None	Log in
111111	Denver Devil Dogs	George	george@denverdevildogs.com		1	None	Log in

[Download Account List](#)

If the default columns that are visible are not exactly what you need, you are free to customize these.

1. Click the **Columns** link to the left of the search bar.
2. Select/un-select the columns that you need and **Save** your changes. Note that the **ID** column is always visible.

Creating Sub Accounts

From the Sub Account Overview click the **Create Sub Accounts** button. This will pop up a form for you to populate with an account name and a user's email address. Your standard welcome email as customized on the Contact tab of your Sub account Settings will also display here for you to customize should you need to make small edits for each sub account.

When you click **Create Account** the contents of this email will be sent to the email address you specified allowing them to log in to their new sub account!

Logging in to Sub Accounts

On the far right of each sub account, you'll have a link to Log in. This will log you into the sub-account as the [administrative user](#) , which means you'll have full access to surveys and users in the sub account.

When you are logged into a sub account you will have a purple banner across the top of the page indicating that you are logged into one of your sub accounts. When you wish to switch back to your master account simply click the **Return to main account** link.

If the sub account has sensitive information that you should not be able to access you can click the pencil icon to edit the sub account's settings and select the option to **Block admin login from this screen**.

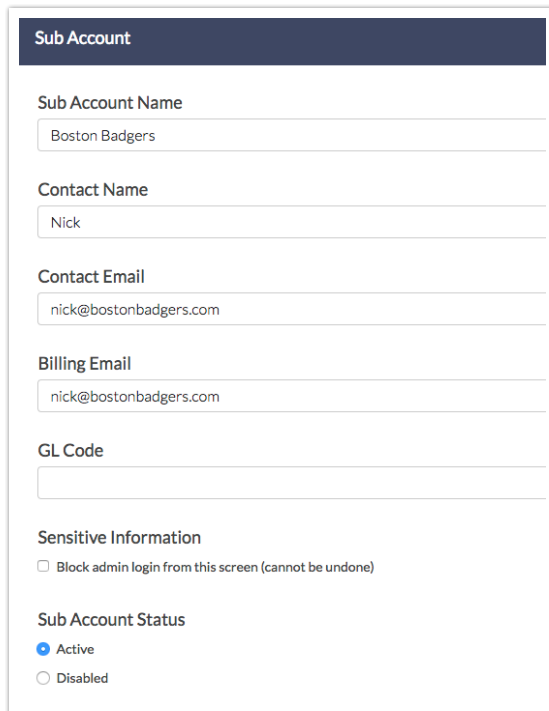

Editing Sub Accounts from the Sub Accounts Screen

On the far right of each sub account, you'll have a pencil icon to make edits to the sub account.

- The sub account edit options on this screen include the ability to change the **Sub Account Name, Contact Name, Contact Email, Billing Email, GL Code**

(general ledger code).

- You can also block the master account's ability to login from the sub accounts screen under **Sensitive Information**.
- Finally, you can disable a sub account under **Sub Account Status**.

The screenshot shows a 'Sub Account' settings form. It includes fields for 'Sub Account Name' (Boston Badgers), 'Contact Name' (Nick), 'Contact Email' (nick@bostonbadgers.com), and 'Billing Email' (nick@bostonbadgers.com). There is an empty 'GL Code' field. Under 'Sensitive Information', there is a checkbox for 'Block admin login from this screen (cannot be undone)'. Under 'Sub Account Status', the 'Active' radio button is selected, and the 'Disabled' radio button is unselected.

What is the experience like for sub account users?

Sub account users will have a unique sign up experience as per your sub account settings.

If the master account administrative user creates the sub accounts the sub account user will receive an email with the login link and the customized email message.

If you prefer to have sub accounts sign up themselves you can do so by sharing the **Sign Up Page URL** available under the **Edit Sub Account Settings** link on the Sub Account Overview. From here they will enter an account name, their email address, and a password. This will create the account and log them in.

Request Access to a Quick Survey Tool

Division-Organization-Account Name

Password

GET STARTED

If the master account billing is set to **Bill each sub account separately**, the sub account will display the trial banner. As such, they will be able to set up their own billing information.

Beyond this, their experience using SurveyGizmo should be unaffected!

Share Survey Templates with Sub Accounts

As a Master Account administrator, you can share survey templates with your sub accounts. This is particularly useful if you need to use standardized surveys across sub accounts.

When you share a template with a sub account, you allow that account to create a survey with that template as a starting point. The template includes the survey *build* and *style*, but does not include response data.

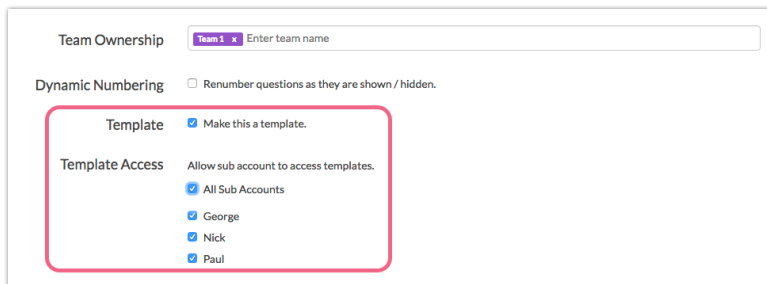

Share Template with Sub Account

It's important to note that when a [survey is configured as a template](#), it is no longer considered an active survey and cannot collect responses. As such, as a best practice we recommend making a [copy of the survey](#) and setting the copy (not the original survey) as the template. *You can also build a survey from scratch with the intention of using it as a template. In this case, you do not need to copy the survey.*

To allow a sub account to access and use one of the master account templates, follow these steps.

1. Access the survey (or copy) that you want to set as a template.

2. Click **Tools > Survey Settings**.
3. Locate the **Template** section and click the checkbox to **Make this a template**.
4. You will see a **Template Access** section appear. Here, you can select which sub accounts will have access to the template. Choose **All Sub Accounts** to open the template to all of your sub accounts, or select specific accounts individually by checking their respective checkboxes.

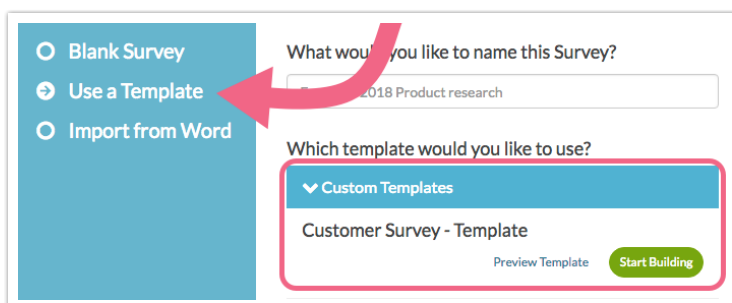

The screenshot shows the 'Survey Settings' interface. At the top, there is a 'Team Ownership' section with a dropdown menu showing 'Team 1' and an 'Enter team name' input field. Below that is the 'Dynamic Numbering' section with a checkbox labeled 'Renumber questions as they are shown / hidden'. The 'Template' section is highlighted with a red box and contains a checkbox labeled 'Make this a template.' which is checked. Below the 'Template' section is the 'Template Access' section, also highlighted with a red box, which contains the text 'Allow sub account to access templates.' and a list of sub-accounts: 'All Sub Accounts' (checked), 'George' (checked), 'Nick' (checked), and 'Paul' (checked).

5. **Save Settings** to finish the process.

Sub Accounts - Access Shared Templates

If the Master Account has shared a template with your Sub Account, you can now create surveys based on that template.

1. To do so, click **Create a Survey** on your SurveyGizmo home page.
2. Rather than starting with a Blank Survey, click **Use a Template**.
3. Next, click the **Custom Templates** dropdown to view all of the templates that have been shared with you.

The screenshot shows the SurveyGizmo interface. On the left, there is a sidebar with three options: 'Blank Survey', 'Use a Template' (highlighted with a red arrow), and 'Import from Word'. The main content area has a form with two sections. The first section is titled 'What would you like to name this Survey?' and has an input field containing '2018 Product research'. The second section is titled 'Which template would you like to use?' and has a dropdown menu labeled 'Custom Templates' which is expanded to show a list of templates. The first template in the list is 'Customer Survey - Template', which has a 'Preview Template' link and a 'Start Building' button. The 'Custom Templates' dropdown and the list of templates are highlighted with a red box.

4. Click **Start Building** to use the template.
