

Question Types Guide

Did you know SurveyGizmo has 42 different question types? Don't be overwhelmed though; this guide covers each question type, what each looks like, and when to use them. Review the below list of question types, starting with the basic and most commonly-used question types and ending with the most advanced. Visit each question's full tutorial linked below to learn more.

Are you curious about the data output from each of SurveyGizmo's question? Visit the [How Does Each Question Report? Tutorial](#).

Basic Question Types

Radio Button

Radio Button questions allow respondents to select a single choice from a list.

When to use it

Use Radio Button questions to ask your respondents to choose a single option from a short list. Radio Button questions should always be used when asking yes or no questions.

Learn more about this question type in the [Radio Button Question Type Tutorial](#).

1. What department are you in?

- Support
- Sales
- Development
- Customer Experience
- IT
- Operations
- Marketing

Check it out in an [example survey!](#)

[Add a survey](#) with this question to your account!

Radio Button Grid

A Radio Button Grid allows respondents to select an answer option (column) for each row in a grid. If you are looking to allow only one response per column, check out our Ranking Grid question type.

When to use it

Use a Radio Button Grid to group a series of radio button questions together that share the same answer options.

1. How often do you use the following social media channels to look for products and services?

	Never	Rarely	Sometimes	Often	Always
Facebook	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Twitter	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Linkedin	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Google+	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Check it out in an [example survey!](#)

[Add a survey](#) with this question to your account!

Radio Button Grid questions are great to use in place of using a series of Rating (Likert Scale) questions when you need to report on the questions together. The grid averages feature will allow you to do just this!

Learn more about this question type in the [Radio Button Grid Question Type Tutorial](#).

Dropdown Menu

Dropdown Menus are single-select questions with answer options displayed in a dropdown list. We also have the ability to create a multi-select Dropdown Menu.

When to use it

Use Dropdown Menus to ask your respondents to choose a single option from a long list. For example, use a Dropdown Menu when asking state of residence. We recommend limiting how many answer options you put in dropdown menu because large sets of options (think 100+) fatigue survey respondents and over 2,000 can cause issues with the Build tab.

Learn more about this question type in the [Dropdown Menu Question Type Tutorial](#).

Checkboxes

Checkbox questions allow your respondents to select multiple answers from a list.

When to use it

Use Checkbox questions to ask your respondents to select multiple answers.

Learn more about this question type in the [Checkboxes Question Type Tutorial](#).

Textboxes

A Textbox question is a short-answer, open-text field.

When to use it

Use Textbox questions to collect a single word or short sentence response. For example, name, street address, or city.

1. What is your state of residence?

✓ -- Please Select --

- Alabama
- Alaska
- American Samoa
- Arizona
- Arkansas
- California
- Colorado
- Connecticut
- Delaware
- District of Columbia
- Federated States of Micronesia

Learn more about this question type in the [Textbox Question Type Tutorial](#).

Essay / Long Answer

An Essay question is an open-text field used to gather longer open-text responses.

When to use it

Use Essay Questions to collect a paragraph or two of text. For example, ask respondents to provide additional feedback in their own words.

Learn more about this question type in the [Essay Question Type Tutorial](#).

Please provide us with any additional feedback:

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

Email

An Email question is a short-answer, open-text field with validation that ensures entries are email addresses.

When to use it

Use Email questions to gather email addresses from your respondents.

Learn more about this question type in the [Email Question Type Tutorial](#).

What is your email address?

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

Date

A Date question is a short-answer, open-text field with validation that ensures entries are dates. You can choose to validate using the following formats:

- MM/DD/YYYY
- DD/MM/YYYY
- YYYY/MM/DD

When to use it

Use Date questions to collect date responses from your respondents.

Learn more about this question type in the [Date Question Type Tutorial](#).

Start date:

What is your start date?

Calendar view showing July 2016. Today is July 27.

Su	Mo	Tu	We	Th	Fr	Sa
26	27	28	29	30	1	2
3	4	5	6	7	8	9
10	11	12	13	14	15	16

Intermediate Question Types

Slider

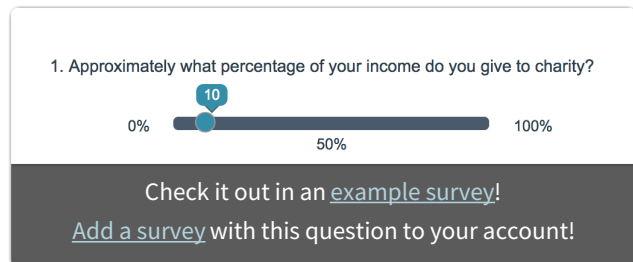

The Slider is an interactive question that allows respondents to select values from a continuous range by dragging a slider along a range.

Use a Slider List to gather feedback on multi items.

When to use it

The Slider is an excellent way to engage your respondents with an interactive numeric sliding scale.

Learn more about this question type and the licenses in which it is available in the [Slider Question Type Tutorial](#).

1. Approximately what percentage of your income do you give to charity?

0% 100%

10

50%

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

Star Rating Grid

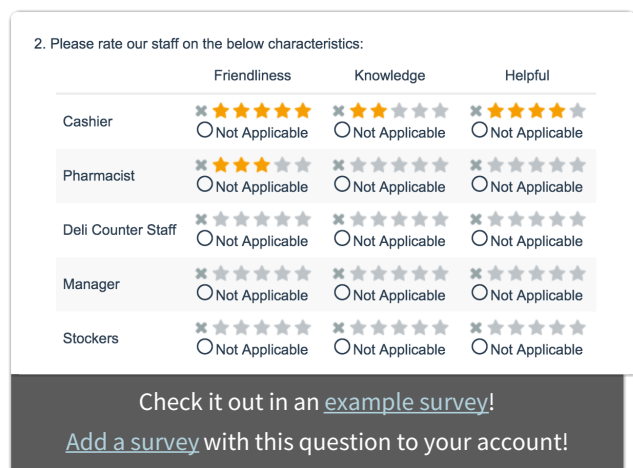

Star Rating Grid questions allow respondents to use stars to rate multiple items (rows) on multiple dimensions (columns). Each star represents the equivalent numeric value for that rating (e.g. Four stars will report a 4).

The X next to each set of stars allows respondents to clear their answer if they change their mind or misclick. You can also choose to provide respondents with a Not Applicable option.

When to use it

Use Star Rating Grid questions as an interactive way to ask your respondents to rate a list of items on multiple characteristics. For example, rate things like customer service and satisfaction.

Learn more about this question type and the licenses in which it is available in the [Star Rating Grid Question Type Tutorial](#).

2. Please rate our staff on the below characteristics:

	Friendliness	Knowledge	Helpful
Cashier	<input type="checkbox"/> X ★★★★★ <input type="radio"/> Not Applicable	<input type="checkbox"/> X ★★★★★ <input type="radio"/> Not Applicable	<input type="checkbox"/> X ★★★★★ <input type="radio"/> Not Applicable

[Add a survey](#) with this question to your account!

Net Promoter Score® (NPS)

Net Promoter Score measures the loyalty between a provider and consumers.

NPS questions are typically phrased like so:

1. Based on your most recent experiences using the platform, how likely are you to recommend this software to a friend?

0 1 2 3 4 5 6 7 8 9 10

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

"Based on your experience, how likely are you to recommend SurveyGizmo to a friend or colleague?"

Respondents respond on a scale from 0 to 10. Typically, the reporting value is numeric for analysis purposes.

When to use it

Use Net Promoter Score questions to gauge your customers' loyalty.

Learn more about this question type and the licenses in which it is available in the [NPS Question Type Tutorial](#).

File Upload

The File Upload question type allows you to have your respondents upload up to 10 files/documents as part of their survey response. You can choose the file extensions you wish to allow as well as a max upload size when you create the question.

When to use it

The possible uses of the file upload question are many. Use it as part of a job application form to allow respondents to upload their resume and cover letter. You might use it in consumer surveys to allow respondents to upload a picture of your product as they found it on the shelf in the store. These are just two of the many possibilities for using this question!

Learn more about this question type and the licenses in which it is available in the [File Upload Question Type Tutorial](#).

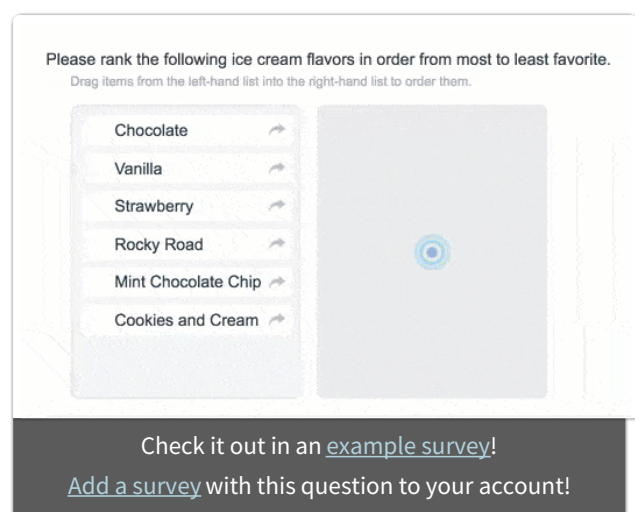

Drag & Drop Ranking

Drag & Drop Ranking questions allow respondents to rank a list of items by *dragging and dropping* each item in order of preference.

While we provide [screen reader messages](#) for this question, it is not easily accessible for respondents using screen readers.

Use the standard ranking question as an alternate accessible version. See Ranking Grid Question Type for more information.

When to use it

Use Drag & Drop Ranking questions as an interactive way to ask your respondents to rank order a list of items first to last.

Learn more about this question type and the licenses in which it is available in the [Drag & Drop Ranking Question Type Tutorial](#).

Ranking Grid

Ranking Grid questions allow respondents to rank a list of items in order, by selecting their numeric rank from a table of radio buttons, where each column is restricted to a single answer across all rows. This question type is designed as a numeric ranking, so you will not be able to put text into the column headers.

When to use it

Use the Ranking Grid question to allow respondents to rank of list of items first to last. You can also use this question in place of Drag & Drop Ranking question for screen reader accessibility.

Learn more about this question type and the licenses in which it is available in the [Ranking Grid Question Type Tutorial](#).

Please rank the following ice cream flavors.

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

Rating (Likert Scale)

A Rating question is a single-select scale question, often referred to as a Likert Scale.

When to use it

Use Rating questions to collect respondents' opinions using answer choices that range from one extreme to another, such as very unhappy to very happy. These choices are shown horizontally, with labels above or below each choice. Typically, the reporting value is numeric for analysis purposes.

Learn more about this question type and the licenses in which it is available in the [Rating \(Likert Scale\) Question Type Tutorial](#).

1. Please indicate the degree to which you agree/disagree with the following statement:
I am happy with my purchase.

	1	2	3	4	NA
Strongly Disagree	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Strongly Agree					

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

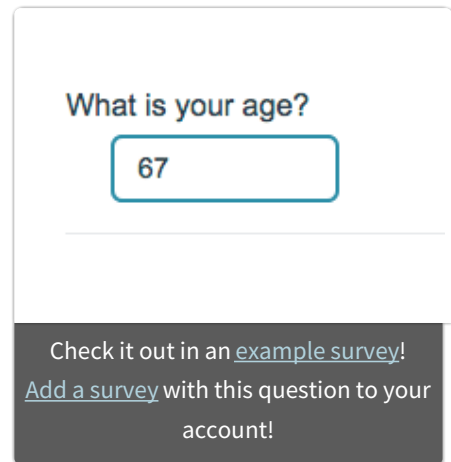

Number

A Number question is a short-answer, open-text field with validation that ensures entries are numbers.

When to use it

Use Number questions to collect number responses from your respondents. For example, age or street number.

Learn more about this question type in the [Number Question Type Tutorial](#).

What is your age?

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

Percent

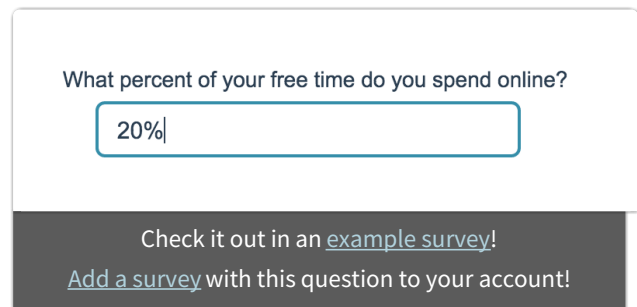

A Percent question is a short-answer, open-text field with validation that ensures entries are percentages.

To allow respondents to enter percentages for a list of items that are then summed for a total value check out our Continuous Sum Question Type.

When to use it

Use Percent questions to collect percentage responses from your respondents.

Learn more about this question type in the [Percent Question Type Tutorial](#).

What percent of your free time do you spend online?

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

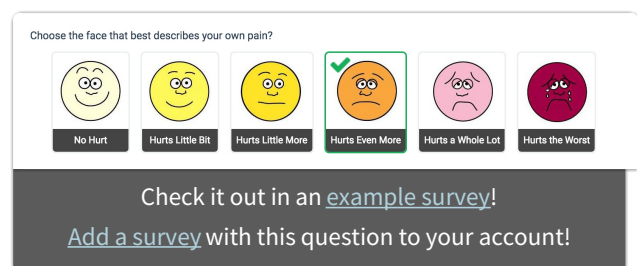

Image Select (select one)

The Image Select (select one) question type is a single-select question with clickable images as answer options.

When to use it

Use the Image Select (select one) question to ask your respondents to choose a single image from a list of images.

Learn more about this question type and the licenses in which it is available in the [Image Select \(select one\) Type Tutorial](#).

Choose the face that best describes your own pain?

					
No Hurt	Hurts Little Bit	Hurts Little More	Hurts Even More	Hurts a Whole Lot	Hurts the Worst

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

Image Select (multi select)

The Image Select (multi select) question type displays multiple images to the respondent allowing them to select their answer by clicking directly on the images. Respondents are able to select multiple images.

When to use it

Use the [Image Select \(select one\)](#) question type if you only want your respondents to select a single image.

Learn more about this question type and the licenses in which it is available in the [Image Select \(multi select\) Question Type Tutorial](#).

Image Heatmap

The Image Heatmap question type allows your survey respondents to provide feedback on an image. Respondents can click anywhere on that image and select answer options you provide e.g. Like, Dislike.

You can also allow respondents to comment on their selections to provide additional context.

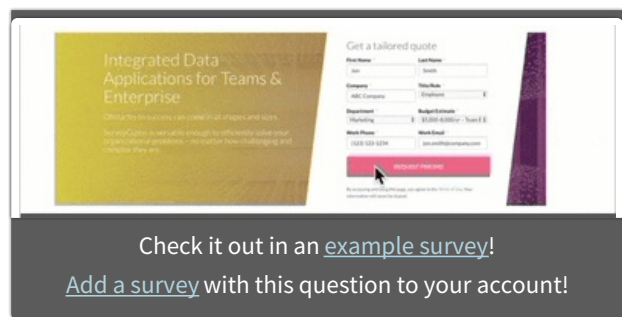

If you want similar functionality for a paragraph of text, check out our [Text Highlighter](#) question type.

When to use it

The Image Heatmap is quite flexible and has a number of potential applications, for example:

- Use the Image Heatmap to gather feedback on a new webpage layout - ask respondents what section of the page they would click to access a specific part of your website to test how intuitive the design is.
- The Image Heatmap can help you perform research on a new product (concept testing). Ask your respondents to indicate what they like/dislike about your upcoming product.

Learn more about this question type and the licenses in which it is available in the [Image Heatmap Question Type Tutorial](#).

Checkbox Grid

The Checkbox Grid allows respondents to select multiple answer options (columns) for each row in a table.

Please tell us which services you have used during this or any previous visit		
	This Visit	Previous Visit
Pool	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Gym	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Restaurant	<input checked="" type="checkbox"/>	<input type="checkbox"/>

When to use it

Use a Checkbox Grid to group a series of checkbox questions together that share the same answer options.

Learn more about this question type and the licenses in which it is available in the [Checkbox Grid Question Type Tutorial](#).

Check it out in an [example survey!](#)
Add a survey with this question to your account!

Text Highlighter

The Text Highlighter question type allows your survey respondents to provide feedback on paragraph or two of text. Respondents can click specific pieces of the text sample and select answer options you provide e.g. Like, Dislike.

You can also allow respondents to comment on their selections to provide additional context.

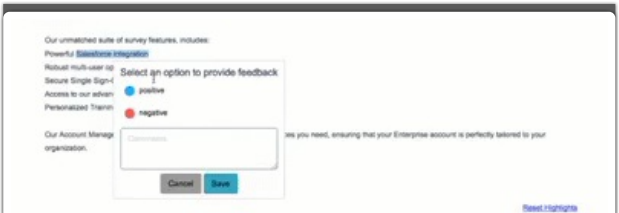

If you want similar functionality for an image, take a look at the Image Heatmap question type.

When to use it

Use the Text Highlighter when you want to gather feedback on text. This question type is great for getting insights on marketing content, a written advertisement, or any other piece of text.

Your respondents can highlight a piece of the text, categorize it according to your answer options, and provide comments to further explain their answer(s).

Learn more about this question type and the licenses in which it is available in the [Text Highlighter Question Type Tutorial](#).

Check it out in an [example survey!](#)
Add a survey with this question to your account!

Signature

The Signature question type allows your survey respondents to add their signature using their mouse or touch screen. The Signature question includes both a field for respondents to sign, as well as, a textbox to type their full name.

When to use it

Use the Signature question for job applications and legal forms. For example, if you're signing a lease on a house, but can't get out of work to do so, why not just sign it online? Because it works great on mobile devices, the signature question is an ideal solution for in-person surveys and market research using an iPad or other tablets.

Sign here:

Check it out in an [example survey!](#)
Add a survey with this question to your account!

Learn more about this question type and the licenses in which it is available in the [Signature Question Type Tutorial](#).

Dropdown Menu List

Dropdown Menu List questions allow respondents to select an option for multiple items in a list using a uniform dropdown of answers.

When to use it

Use a Dropdown Menu List to display multiple dropdown questions that share the same possible answers. For example, purchased quantity of a list of products.

Learn more about this question type and the licenses in which it is available in the [Dropdown Menu List Question Type Tutorial](#).

How many of the below products have you purchased in the past year?

Blue-Rays/DVDs	4-6
Movie Posters	-- Please Select --
Candy	1-3
	4-6
	7-9
	10+

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

Textbox List

A Textbox List is a list of short-answer, open-text fields with labels for each row.

You can define the textbox width and choose to position the labels on the left or right side of the input field.

When to use it

Use a Textbox List to allow respondents to provide a short-answer response for a list of items. While these fields were designed to collect short answers there is actually no character limit set on these fields.

Learn more about this question type and the licenses in which it is available in the [Textbox List Question Type Tutorial](#).

What is your favorite movie in the following genres?

Drama	Schindler's List
Comedy	Annie Hall
Foreign	Amelie
Western	h Cassidy and the Sundance Kid

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

Advanced Question Types

Continuous Sum

Continuous Sum questions allow respondents to enter numeric values (often percentages or dollar amounts) for a list of items that are then summed for a total value.

What percentage of your time do you spend on the following tasks?

20%	Email Support
30%	Phone Support
	Live Chat Support

50.00% out of 100% Total

Check it out in an [example survey!](#)

When to use it

This question type is used to see how a larger value, such as a budget, is allocated across several items.

Learn more about this question type and the licenses in which it is available in the [Continuous Sum Question Type Tutorial](#).

Slider List

The Slider List is an interactive question that allows respondents to select values for multiple rows of items by dragging a slider along a range.

If you want to use a slider to rate a single item, check out our Slider question type.

When to use it

The slider question is an excellent way to re-think semantic differentials or Likert scale questions in a way that really engages your respondents.

Learn more about this question type and the licenses in which it is available in the [Slider List Question Type Tutorial](#).

Video Sentiment

The Video Sentiment question type allows your survey respondents to provide continuous feedback while watching a video, by dragging a slider along a range.

If you would like to gather continuous feedback for audio media instead, use the Video Sentiment question type.

When to use it

Use the Video Sentiment question to gather second-by-second feedback on a video.

Respondents can react to the video at any point while it is playing, by moving a slider. Each interaction with the slider is recorded and is time stamped for reports. You can also allow respondents to comment.

Learn more about this question type and the licenses in which it is available in the [Video Sentiment Question Type Tutorial](#).

[Add a survey](#) with this question to your account!

1. Please rate the SurveyGizmo Customer Support Hero on the following:

	Poor	Neutral	Excellent		
Promptness				4	<input type="checkbox"/> Not Applicable
Courteous				5	<input type="checkbox"/> Not Applicable
Helpful				2	<input type="checkbox"/> Not Applicable
Knowledge					<input type="checkbox"/> Not Applicable
Efficient					<input type="checkbox"/> Not Applicable

Check it out in an [example survey!](#)

[Add a survey](#) with this question to your account!

Audio Sentiment

The Audio Sentiment Question Type allows your survey respondents to provide continuous feedback while listening to audio, by dragging a slider along a range.

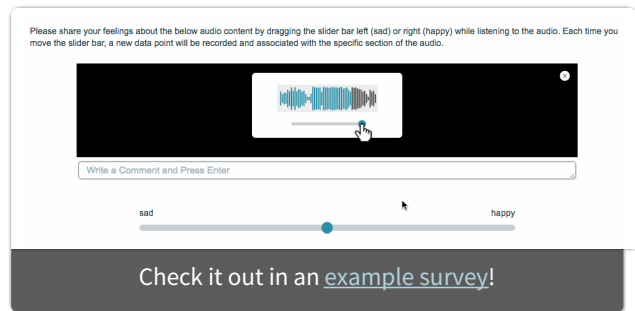

If you would like to gather continuous feedback for video media instead, use the Video Sentiment question type.

When to use it

Use the Audio Sentiment question to gather continuous feedback on audio media.

Respondents can react to the audio at any point while it is playing, by moving a slider. Each interaction with the slider is recorded and is time stamped for reports. You can also allow respondents to comment.

Learn more about this question type and the licenses in which it is available in the [Audio Sentiment Question Type Tutorial](#).

Cascading Dropdown Menu

The Cascading Dropdown Menu allows you to drill down through hierarchical data by using one dropdown menu as a filter into the next.

For example, a common use is the collection of the respondent's state and city. Using this question type, the respondent's state selection can be used to filter the options in the city dropdown.

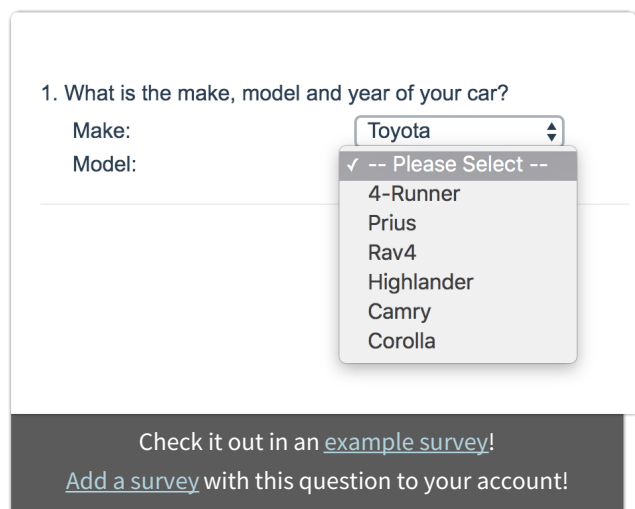

When to use it

If you need your respondents to select from a very large list, say the university/school they went to, that list can be up to 4000 items long!

Using a Cascading Dropdown, you can filter the options in the school dropdown by the state selection. By making it easier for the respondent to locate values, you will improve your respondent's experience and, as a result, you will likely get better data!

Some additional examples of when you might use a Cascading Dropdown:

- Product Category, Product
- Car Make, Model, Year
- State/Province, Cities
- Sales Region, Sales Representatives

Learn more about this question type and the licenses in which it is available in the [Cascading Dropdown Menu Question Type Tutorial](#).

Conjoint (Choice-Based)

Conjoint is a market research question used to determine how customers value the various features that make up an individual product or service. Use the Conjoint question to determine what combination of features is most influential in customer decision making.

1. In this question, we will show you four combinations of TV models. For each combination, indicate which TV model you would be most likely to purchase.

Brand	Yanso	Edge	TVC	
Screen Size	56"	40"	36"	None: I wouldn't choose any of these
Refresh Rate	120hz	240hz	120hz	
Price	\$899	\$799	\$1099	
HDMI Ports	4 2.0 HDMI Ports	1 2.0 HDMI Port	2 2.0 HDMI Ports	
Wi-Fi	No Wi-Fi	No Wi-Fi	No Wi-Fi	

Check it out in an [example survey!](#)

The SurveyGizmo Conjoint question uses choice-based conjoint analysis (CBC) (also known as discrete choice conjoint analysis). CBC is the most common form of conjoint analysis. The respondent is asked to indicate the option or package they are most likely to purchase. The importance of attribute features and levels can be mathematically deduced from the trade-offs made when selecting one (or none) of the available choices.

As an example, say we're researching what attributes are most influential when purchasing a TV. We have the below attributes and attribute levels:

- **Brand:** Edge, TVC, Yanso
- **Screen Size:** 36", 40", 48", 56", 60", 75"
- **Refresh Rate:** 60hz, 120hz, 240hz
- **Price:** \$499, \$529, \$799, \$899, \$1099, \$1499
- **HDMI Ports:** 1, 2, 3, or 4 ports
- **Wi-Fi:** Wi-Fi Enabled, No Wi-Fi

Using the choice-based conjoint question we can show combinations (aka cards) of potential attribute levels to respondents to analyze how they make choices between these products.

Learn more about this question type and the licenses in which it is available in the [Conjoint \(Choice-Based\) Question Type Tutorial](#).

Grouping (Open Card Sort)

The Grouping (Card Sort) question type is interactive and allows respondents to categorize options by clicking and dragging items into Groups of their choosing.

When to use it

Use the Grouping (Open Card Sort) question when asking your respondents to place options into categories that they provide.

Please place each item in the category that appears best suited for the item.

Drag items from below into the appropriate categories.

Dropdown Menu Grid

The Dropdown Menu Grid allows respondents to select an option for each column and row combination using a uniform dropdown of answers.

When to use it

Use a Dropdown Menu Grid to display multiple dropdown questions that share the same possible answers. The dropdown menus are presented as 'cells' within the grid.

Learn more about this question type and the licenses in which it is available in the [Dropdown Menu Grid Question Type Tutorial](#).

When do you eat breakfast, lunch and dinner on weekdays and weekends?

	Breakfast	Lunch	Dinner
Monday-Friday	6am	✓ -- Please Select --	-- Please Select --
Saturday and Sunday	-- Please Select --	5am 6am 7am 8am	-- Please Select --

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

Textbox Grid

The Textbox Grid allows respondents to enter short open-ended text answers to multiple questions in a table format. Each 'cell' in the table is a textbox.

When to use it

Use Textbox Grids to group multiple short-answer questions together. While these fields were designed to collect short answers there is no actual character limit set on these fields.

Consider using the Textbox List question type for a one-column-display.

Learn more about this question type and the licenses in which it is available in the [Textbox Grid Question Type Tutorial](#).

How many calories did you consume for each meal of the day this week?

	Breakfast	Lunch	Dinner	Snacks
Monday	400	500	800	150
Tuesday	3			
Wednesday				
Thursday				
Friday				
Saturday				
Sunday				

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

Max Diff

Using the Max Diff question type (aka maximum difference scaling) respondents are shown a set of the possible attributes and are asked to indicate the best and worst attributes (or most and least important, most and least appealing, etc.).

When to use it

Max Diff is an alternative to standard rating scale results that might lead you to believe everything is important. By forcing respondents to make choices between options, Max Diff delivers results that show the relative importance of the items being rated.

Which of the following support channels would you most/least desire?

Least Desirable	Support Channel	Most Desirable
<input type="radio"/>	Social Media Support	<input type="radio"/>
<input type="radio"/>	Email Support	<input type="radio"/>
<input type="radio"/>	Live Chat Support	<input type="radio"/>

Semantic Diff

Semantic Differential questions are a form of rating scale designed to identify the connotative meaning of objects, words, and concepts.

When to use it

Similar to a Likert question, a Semantic Differential allows you to collect many opinions in one question.

Learn more about this question type and the licenses in which it is available in the [Semantic Diff Question Type Tutorial](#).

Contact Form

The Contact Form question type is a formatted group of textboxes designed to collect contact information.

When to use it

Add a Contact Form to collect contact information from your respondents.

Custom Group

The Custom Group question type allows you to group questions of different types together and control the layout of the questions, specifically whether there is a line break and the next question displays on the same line.

When to use it

Use Custom Groups to group different questions types together to show that they're all related to each other. For example, you could add a Dropdown Menu, a Textbox, and a multiple choice question all into one group of questions.

User Data

If you are using [User Data Fields](#) to store data about each of your SurveyGizmo users, you can leverage this data within surveys using the User Data question.

As an example, let's say that we've set up training course instructors as users in our SurveyGizmo account. Within their User Data Fields, we store information about the course each user teaches. We can leverage this data to create a survey question. Respondents can then select the course that they took, which then maps back to the instructor data allowing you to share individualized reports.
